INTRODUCTION

The Early and Periodic Screening, Diagnostic, and Treatment (EPSDT) benefit includes a comprehensive array of preventive, diagnostic, and treatment services for Medicaid eligible infants, children and adolescents under age 21, as specified in Section 1905(r) of the Social Security Act (the Act). The EPSDT benefit is also available to PeachCare for Kids® members up to 19 years of age. The EPSDT benefit is designed to assure that children receive early detection and care, so that health problems are averted or diagnosed and treated as early as possible. The goal of the EPSDT benefit is to assure that individual children get the health care they need when they need it. The EPSDT benefit also covers medically necessary diagnostic services. When a screening examination indicates the need for further evaluation of a child's health, the child should be appropriately referred for diagnosis without delay. States are required to arrange for and cover under the EPSDT benefit any Medicaid covered service listed in Section 1905(a) of the Act if that treatment or service is determined to be medically necessary to correct or ameliorate defects and physical and mental illnesses or conditions. This includes physician, nurse practitioner and hospital services; physical, speech/language, and occupational therapies; home health services, including medical equipment, supplies, and appliances; treatment for mental health and substance use disorders; treatment for vision, hearing and dental diseases and disorders, and much more. This broad coverage requirement results in a comprehensive, high-quality health benefit for children under age 21 enrolled in Medicaid.

Reference: EPSDT – A Guide for States: Coverage in the Medicaid Benefit for Children and Adolescents available at http://www.medicaid.gov/Medicaid-CHIP-Program-Information/By-Topics/Benefits/Downloads/EPSDT_Coverage_Guide.pdf

The Health Check Program provides reimbursement for preventive health services, interperiodic visits, developmental screenings, brief emotional/behavioral assessments, hearing and vision screenings, and immunizations under the EPSDT benefit. This manual provides information pertaining to the required screening components of the EPSDT program which should be performed in accordance with the American Academy of Pediatrics (AAP) Bright Futures recommendations for preventive health/well-child check-ups. Diagnostic and Treatment (DT) services available under the EPSDT benefit are reimbursed under other program areas within the Georgia Medicaid and PeachCare for Kids® programs.

The Early and Periodic Screening Components of EPSDT

All screening components for the preventive exam should be provided as outlined in this manual. The required screening components include: a comprehensive unclothed physical examination (unclothed means to the extent necessary to conduct a full, age-appropriate examination); a comprehensive health and developmental history; developmental appraisal (including mental, emotional and behavioral health components); anticipatory guidance and health education; measurements; dental/oral health assessment; vision and hearing tests; certain laboratory procedures; lead risk assessments, and immunizations. Immunizations as needed should be given at the time of the preventive health visit as appropriate. All of the age appropriate components per the periodicity schedule and this manual must be completed and documented for each screening as appropriate. All preventive/well-child services must be provided under the EPSDT benefit following the policies and procedures as outlined in this manual.

The Diagnostic and Treatment Components of EPSDT

Rev. 01/10
Rev. 07/14

The Diagnostic and Treatment policies, procedures, and billing for the EPSDT benefit are found under other Georgia Medicaid programs. However, the Health Check provider may address a medical condition at the time of the preventive health visit or during an interperiodic visit. Under these circumstances, the Health Check provider bills for the office visit associated with the medical condition.

Provider Manuals relevant to the EPSDT benefit include, but may not be limited to :

The Medically Fragile Child

Rev. 07/14
Rev. 10/14

Many medically fragile children are under the care of medical specialists. The child's primary care provider may request Diagnostic and Treatment services for the child by documenting the medical necessity for the proposed medical service. The practitioner must state the medical reason for the requested service as it relates to the child's medical condition or diagnosis. These providers should refer to their applicable Medicaid programs' policies and procedures manual for policy guidelines. See Appendix M for resources available to children in Georgia and Appendix D for an explanation of services provided under the *Children's Intervention Services* program.

PART II - CHAPTER 600

Special Conditions of Participation

601. Enrollment

Rev. 07/11
Rev. 04/12
Rev. 04/14
Rev. 10/14

Physicians (pediatricians, family practitioners, general practitioners, internists, and OB/GYN specialists), Advanced Nurse Practitioners (pediatric, OB/GYN, family medicine or adult medicine), Certified Nurse Midwives, Local Education Agencies (LEAs) [*school districts*], hospitals, Local Boards of Health (county health departments), Rural Health Centers (RHCs) or Federally Qualified Health Centers (FQHCs) may enroll in the Health Check Program to provide EPSDT services. Physician sponsored advanced nurse practitioners (pediatric, OB/GYN, family medicine or adult medicine) and physician's assistants may also enroll in the Health Check program but must maintain current written protocols and physician sponsorship. These non-physician providers must submit an official letter from their physician sponsor as proof of physician sponsorship at the time of enrollment and at the time their physician sponsorship changes. Providers who wish to provide Diagnostic and Treatment services should enroll in their respective Medicaid program, such as Physician Services, Advanced Nurse Practitioner Services, etc. Physicians, nurse practitioners and nurse midwives may enroll in the Health Check Program to provide EPSDT services and their respective programs to provide diagnostic and treatment services by completing only one provider data form.

Local Education Agencies, hospitals, Local Boards of Health, RHCs or FQHCs must enroll as an entity, as opposed to each provider that will be providing services enrolling individually. The enrolling entity must ensure that only staff members who meet the qualifications listed in Section 602 of this manual are providing services.

Application Process

Rev. 01/10
Rev. 10/14
Rev. 07/17

Providers who wish to enroll in the Health Check program are required to:

- Meet the Conditions of Participation in Medicaid's Part I Policies and Procedures for Medicaid and PeachCare for Kids® Manual (Part I Manual) and the special conditions listed in Section 602;
- Read the EPSDT Benefit Policy Manual prior to signing enrollment forms and;
- Complete and sign the Health Check Required Equipment form in Appendix G

In addition, it is strongly encouraged that providers submit an application for enrollment into the Vaccines For Children (VFC) Program – see Section 905.3 for more information.

The Department of Community Health contracts with DXC to provide an electronic health care administration system for its contracted providers. The DXC field representatives are responsible for assisting Medicaid and PeachCare for Kids® providers with claims adjudication, the web portal and technical support. Contact DXC at 1-800-766-4456 for more information.

602. Special Conditions of Participation

In addition to the general Conditions of Participation contained in Part I Policies and Procedures for Medicaid and PeachCare for Kids®, providers in the Health Check program must meet the following requirements:

- A. Physicians, including those employed or contracted by an LEA, must be currently licensed to practice medicine. (Refer to the Physician Services Manual)
- B. Nurse Practitioners, including those employed or contracted by an LEA, must maintain a current registered nurse license for the State of Georgia and current specialty certification by the appropriate certifying agent of the American Nurses Association. (Refer to the Advanced Nurse Practitioners Manual)
- C. Nurse Midwives, including those employed or contracted by an LEA, must maintain a current registered nurse license and current certification as a nurse-midwife by the American College of Nurse-Midwives (ACNW). A copy of the national certification must be on file with the Division of Medicaid. (Refer to the Nurse Midwifery Manual)
- D. Physician-sponsored providers, including those employed or contracted by an LEA, must be currently licensed to practice and must submit a copy of their license with the application. They must also maintain current written protocols, physician sponsorship and submit an official letter from their physician sponsor as proof of physician sponsorship. These providers include:
 - Certified pediatric, OB/GYN, family, general or adult nurse practitioners. A recent graduate of a Nurse Practitioner Program may enroll as a Nurse Practitioner once he/she passes the Specialty Certification exam.
 - Physician assistants must be licensed by the Georgia Board of Medical Examiners and be associated with one or more sponsoring physician(s) on file with the Composite State Board of Medical Examiners. (Refer to the Physician Assistant Services Manual)
 - Public Health registered nurses, affiliated with a Georgia local board of health, who have successfully completed the required training for expanded role nurses.

Rev. 04/09
Rev. 01/10
Rev. 10/10
Rev. 07/11
Rev. 04/14
Rev. 07/14
Rev. 07/15
Rev. 01/16

602.1 Health Check providers must provide immunizations. It is recommended the provider enroll in the VFC program and submit a VFC Provider Enrollment Letter with their Health Check Provider Enrollment Application. This is encouraged because the vaccine administration fee is the only reimbursement a provider will receive for administering vaccines otherwise available through the VFC program. (The VFC vaccines may only be used by certain populations. See Section 905.3) For members nineteen (19) years of age through twenty (20) years of age, VFC stock is not available. Providers must use their own stock of vaccines for these Medicaid eligible members and the Division will reimburse for the vaccine product and for vaccine administration.

Rev. 07/11
Rev. 10/14

602.2 Health Check providers must submit documentation verifying they possess the necessary equipment to perform all components of the periodic screening (See Chapter 900, Section 903 for the equipment list.)

602.3 Health Check providers must determine whether members requesting a preventive health visit have already received that periodic screening. Periodic screenings for foster children in state custody are an exception to this requirement.

602.4 Health Check providers must perform, at the time of the member's preventive health visit, all of the EPSDT required components for that visit as listed below, along with those identified in the Bright Futures Periodicity Schedule (see Section 902.1). The EPSDT required components include:

Rev. 01/10
Rev. 07/11
Rev. 07/14
Rev. 10/14

- A. A comprehensive health and developmental history, developmental appraisal (including mental, emotional and behavioral)
- B. A comprehensive unclothed physical examination (unclothed means to the extent necessary to conduct a full, age-appropriate examination) including measurements
- C. Health education and anticipatory guidance for both the child and caregiver
- D. Dental/oral health assessment
- E. Vision and hearing assessments
- F. Laboratory testing (including blood lead screening appropriate for age and risk factors)
- G. Appropriate immunizations, in accordance with the pediatric and adult schedules for vaccines established by the Advisory Committee on Immunization Practices

602.5 The Health Check provider must:

Rev. 07/11
Rev. 10/11
Rev. 10/14
Rev. 01/15

- A. Use Place of Service (POS) code 99 for all preventive health services and interperiodic visits. Public Health providers – see Section 1003.11 for additional information;
- B. Document, in the member's health record, all services provided during the preventive health visit;
- C. Make available for on-site audits by the Division or its agents all records related to EPSDT services. Providers must submit plans for corrective action when requested;

- D. Refer the member to other ancillary service providers for services that are not covered under the Medicaid or PeachCare for Kids® programs;
- E. Provide services in a manner consistent with the policies, procedures and requirements outlined in this manual;
- F. If performing the required laboratory testing, be in compliance with the Clinical Laboratory Improvement Amendment. Providers seeking information concerning laboratory services should contact:

Office of Health Care Facilities Regulations at (404) 657-5400

- G. Maintain an office, clinic, or other similar physical facility, which complies with local business and building license ordinances;
- H. Provide immunizations as needed at the time of the preventive health visit. Providers not enrolled in the VFC program will not be reimbursed for the cost of the vaccine they administer to Medicaid members if those vaccines can be provided under the VFC program. They will only be reimbursed the vaccine administration fee. To enroll in the Vaccines For Children Program, please call 1-800-848-3868. For members nineteen (19) years of age through twenty (20) years of age, VFC stock is not available. Providers must use their own stock of vaccines for these Medicaid eligible members and the Division will reimburse for the vaccine product and for vaccine administration.
- I. Maintain legible, accurate, and complete medical records in order to support and justify the services provided. A *Medical record* is a summary of essential medical information on an individual patient including dated reports supporting claims submitted to the Division for services provided in an office, hospital, outpatient, or other place of service. Records of service shall be entered in chronological order by the practitioner who rendered the service.

602.6 All documentation in the medical record shall be legible and shall include but not be limited to:

1. Date(s) of service
2. Patient's name and date of birth
3. Name and title of person performing the service
4. Pertinent medical history; immunizations
5. Pertinent findings on examination
6. Medications, equipment or supplies prescribed/provided
7. Recommendations for additional treatment, procedures, or consultations
8. Tests and results
9. Plan of treatment/care and outcomes
10. Refusal of care documented with signed form by responsible person for member
11. The signature of the person performing the service. The original handwritten personal signature (electronic or fax signatures are acceptable only if these documents are legible) of the person performing the service must be on each document contained in the patient's medical record. When a fax document or signature is included in the medical record, the document with the original

signature must be retrievable from the original source. This includes but is not limited to progress notes and lab reports for each date of service billed.

NOTE: *Electronic signature is defined as "an electronic or digital method executed or adopted by a party with the intent to be bound by or to authenticate a record, which is unique to the person using it, is capable of verification, is under the sole control of the person using it, and is linked to the data in such a manner that if the data are changed the signature is invalidated." O.C.G.A. 10-12-3. (1) (1997)*

Rev. 01/16

12. All documents contained in the medical record must be written in Standard English Language. Records must be available to the Georgia Division of Medicaid or its agents and to the U.S. Department of Health and Human Services upon request. Documentation must be timely, complete, and consistent with the by-laws and medical policies of the office or facility where the services are provided.

PART II - CHAPTER 700

Special Eligibility Conditions

Rev. 01/11
Rev. 07/14
Rev. 10/14

All persons eligible for Medicaid who are less than twenty-one (21) years of age are eligible for the EPSDT benefit with the exception of women aged eighteen to twenty-one (18 to 21) who are enrolled in the Planning for Healthy Babies Program (P4HB®). P4HB participants are not eligible for the EPSDT benefit. All persons eligible for the PeachCare for Kids® program are eligible for the EPSDT benefit.

PART II - CHAPTER 800

Prior Approval/Authorization

Rev. 01/10
Rev. 07/11
Rev. 10/11
Rev. 10/14

- 801.** The Health Check provider must provide all of the required EPSDT preventive health services, as identified by the periodicity schedule and this manual, during the preventive visit in order to be reimbursed at the Health Check visit rate. If additional service needs are identified, through the screening process, that are outside the scope of practice of the EPSDT primary care provider (PCP), the member must be referred to a provider who can address those needs.

If the provider is not the member's EPSDT PCP, the provider must notify the member's PCP of the preventive health/interperiodic visit and any additional service needs identified during that visit. The member's PCP must make the appropriate referral(s).

Some EPSDT services provided to Medicaid and PeachCare for Kids® members may require prior authorization and/or a referral if the member has a PCP/medical home and the member's PCP/medical home does not perform those additional services.

Documentation of care rendered outside of the PCP or the medical home (such as medical records and immunization charting) must be sent to the PCP or the medical home as identified by the member within five (5) business days of the provision of those services.

- 802.** Prior authorization may be required for services rendered by Diagnostic and Treatment providers. These providers should refer to their applicable Medicaid policy and procedure manuals for a listing of the services that require prior approval.

PART II - CHAPTER 900

Scope of Services

Rev. 01/11
Rev. 07/11
Rev. 10/14

901. General

The Health Check Program provides reimbursement for preventive health and interperiodic visits and other services provided during those visits.

The Diagnostic and Treatment components of the EPSDT benefit are covered under other Georgia Medicaid programs as described previously in this manual. Those programmatic policies and procedures should be followed as specified in the appropriate related manuals (i.e., Physician Services program, etc.). Diagnostic and Treatment services are provided for identified suspicious or abnormal conditions by either the Health Check provider, if qualified to perform those services, or upon referral to an appropriate service provider of the member's choice.

902. AAP Periodicity Schedule and Georgia Minimum Standards for Screening Components

Effective July 1, 2017, the Georgia Division of Medical Assistance Plans adopted the American Academy of Pediatrics (AAP) Bright Futures "Recommendations for Pediatric Health Care" Periodicity Schedule as the periodicity schedule for EPSDT visits and services. The schedule is available at https://www.aap.org/en-us/documents/periodicity_schedule.pdf The updated 2017 schedule includes numerous changes including footnote revisions.

902.1 Periodicity Schedule and Screening Sequence

Rev. 07/11
Rev. 10/14
Rev. 10/15
Rev. 01/16
Rev. 04/16
Rev. 07/17

The periodic intervals for screening for all Medicaid and PeachCare for Kids® Health Check providers, as shown on the following page, are based on the American Academy of Pediatrics' recommendations.

NOTE: *The updated 2017 Periodicity Schedule should be used for all EPSDT preventive health visits completed on or after July 1, 2017. Exception: the prenatal visit and over 21 years of age visit as listed on the schedule are not covered under the Health Check Category of Service (COS) 600.*

(continued)

19. Confirm initial screen was accomplished, verify results, and follow up, as appropriate. The Recommended Uniform Newborn Screening Panel (<http://www.hrsa.gov/advisorycommittees/mchbadvisory/heritabledisorders/recommendedpanel/uniformscreeningpanel.pdf>), as determined by The Secretary's Advisory Committee on Heritable Disorders in Newborns and Children, and state newborn screening laws/regulations (<http://genes-r-us.uthscsa.edu/sites/genes-r-us/files/nbdisorders.pdf>) establish the criteria for and coverage of newborn screening procedures and programs.
20. Verify results as soon as possible, and follow up, as appropriate.
21. Confirm initial screening was accomplished, verify results, and follow up, as appropriate. See "Hyperbilirubinemia in the Newborn Infant ≥35 Weeks' Gestation: An Update With Clarifications" (<http://pediatrics.aappublications.org/content/124/4/1193>).
22. Screening for critical congenital heart disease using pulse oximetry should be performed in newborns, after 24 hours of age, before discharge from the hospital, per "Endorsement of Health and Human Services Recommendation for Pulse Oximetry Screening for Critical Congenital Heart Disease" (<http://pediatrics.aappublications.org/content/129/1/190.full>).
23. Schedules, per the AAP Committee on Infectious Diseases, are available at http://redbook.solutions.aap.org/55/immunization_schedules.aspx. Every visit should be an opportunity to update and complete a child's immunizations.
24. See "Diagnosis and Prevention of Iron Deficiency and Iron-Deficiency Anemia in Infants and Young Children (0–3 Years of Age)" (<http://pediatrics.aappublications.org/content/126/5/1040.full>).
25. For children at risk of lead exposure, see "Low Level Lead Exposure Harms Children: A Renewed Call for Primary Prevention" (http://www.cdc.gov/nceh/lead/ACC/LPP/Final_Document_030712.pdf).
26. Perform risk assessments or screenings as appropriate, based on universal screening requirements for patients with Medicaid or in high prevalence areas.
27. Tuberculosis testing per recommendations of the AAP Committee on Infectious Diseases, published in the current edition of the AAP Red Book: Report of the Committee on Infectious Diseases. Testing should be performed on recognition of high-risk factors.
28. See "Integrated Guidelines for Cardiovascular Health and Risk Reduction in Children and Adolescents" (http://www.nhlbi.nih.gov/guidelines/cvd_ped/index.htm).
29. Adolescents should be screened for sexually transmitted infections (STIs) per recommendations in the current edition of the AAP Red Book: Report of the Committee on Infectious Diseases.
30. Adolescents should be screened for HIV according to the USPSTF recommendations (<http://www.uspreventiveservicestaskforce.org/uspstf/uspshiv.htm>) once between the ages of 15 and 18, making every effort to preserve confidentiality of the adolescent. Those at increased risk of HIV infection, including those who are sexually active, participate in injection drug use, or are being tested for other STIs, should be tested for HIV and reassessed annually.
31. See USPSTF recommendations (<http://www.uspreventiveservicestaskforce.org/uspstf/uspsscerv.htm>). Indications for pelvic examinations prior to age 21 are noted in "Gynecologic Examination for Adolescents in the Pediatric Office Setting" (<http://pediatrics.aappublications.org/content/126/3/513.full>).
32. Assess whether the child has a dental home. If no dental home is identified, perform a risk assessment (<http://www2.aap.org/oralhealth/docs/RiskAssessmentTool.pdf>) and refer to a dental home. Recommend brushing with fluoride toothpaste in the proper dosage for age. See "Maintaining and Improving the Oral Health of Young Children" (<http://pediatrics.aappublications.org/content/134/6/1224>).
33. Perform a risk assessment (<http://www2.aap.org/oralhealth/docs/RiskAssessmentTool.pdf>). See "Maintaining and Improving the Oral Health of Young Children" (<http://pediatrics.aappublications.org/content/134/6/1224>).
34. See USPSTF recommendations (<http://www.uspreventiveservicestaskforce.org/uspstf/uspdpdch.htm>). Once teeth are present, fluoride varnish may be applied to all children every 3–6 months in the primary care or dental office. Indications for fluoride use are noted in "Fluoride Use in Caries Prevention in the Primary Care Setting" (<http://pediatrics.aappublications.org/content/134/3/626>).
35. If primary water source is deficient in fluoride, consider oral fluoride supplementation. See "Fluoride Use in Caries Prevention in the Primary Care Setting" (<http://pediatrics.aappublications.org/content/134/3/626>).

Summary of Changes Made to the Bright Futures/AAP Recommendations for Preventive Pediatric Health Care (Periodicity Schedule)

This schedule reflects changes approved in February 2017 and published in April 2017.
For updates, visit www.aap.org/periodicityschedule.
For further information, see the *Bright Futures Guidelines*, 4th Edition, *Evidence and Rationale chapter*
(https://brightfutures.aap.org/Bright%20Futures%20Documents/BF4_Evidence_Rationale.pdf).

CHANGES MADE IN FEBRUARY 2017

HEARING

- Timing and follow-up of the screening recommendations for hearing during the infancy visits have been delineated. Adolescent risk assessment has changed to screening once during each time period.
- Footnote 8 has been updated to read as follows: "Confirm initial screen was completed, verify results, and follow up, as appropriate. Newborns should be screened, per 'Year 2007 Position Statement: Principles and Guidelines for Early Hearing Detection and Intervention Programs' (<http://pediatrics.aappublications.org/content/120/4/898.full>)."
- Footnote 9 has been added to read as follows: "Verify results as soon as possible, and follow up, as appropriate."
- Footnote 10 has been added to read as follows: "Screen with audiometry including 6,000 and 8,000 Hz high frequencies once between 11 and 14 years, once between 15 and 17 years, and once between 18 and 21 years. See 'The Sensitivity of Adolescent Hearing Screens Significantly Improves by Adding High Frequencies' ([http://www.jahonline.org/article/S1054-139X\(16\)00048-3/fulltext](http://www.jahonline.org/article/S1054-139X(16)00048-3/fulltext))."

PSYCHOSOCIAL/BEHAVIORAL ASSESSMENT

- Footnote 13 has been added to read as follows: "This assessment should be family centered and may include an assessment of child social-emotional health, caregiver depression, and social determinants of health. See 'Promoting Optimal Development: Screening for Behavioral and Emotional Problems' (<http://pediatrics.aappublications.org/content/135/2/384>) and 'Poverty and Child Health in the United States' (<http://pediatrics.aappublications.org/content/137/4/e20160339>)."

TOBACCO, ALCOHOL, OR DRUG USE ASSESSMENT

- The header was updated to be consistent with recommendations.

DEPRESSION SCREENING

- Adolescent depression screening begins routinely at 12 years of age (to be consistent with recommendations of the US Preventive Services Task Force [USPSTF]).

MATERNAL DEPRESSION SCREENING

- Screening for maternal depression at 1-, 2-, 4-, and 6-month visits has been added.
- Footnote 16 was added to read as follows: "Screening should occur per 'Incorporating Recognition and Management of Perinatal and Postpartum Depression Into Pediatric Practice' (<http://pediatrics.aappublications.org/content/126/5/1032>)."

NEWBORN BLOOD

- Timing and follow-up of the newborn blood screening recommendations have been delineated.
- Footnote 19 has been updated to read as follows: "Confirm initial screen was accomplished, verify results, and follow up, as appropriate. The Recommended Uniform Newborn Screening Panel (<http://www.hrsa.gov/advisorycommittees/mchbadvisory/heritabledisorders/recommendedpanel/uniformscreeningpanel.pdf>), as determined by The Secretary's Advisory Committee on Heritable Disorders in Newborns and Children, and state newborn screening laws/regulations (<http://genes-r-us.uthscsa.edu/sites/genes-r-us/files/nbdisorders.pdf>) establish the criteria for and coverage of newborn screening procedures and programs."
- Footnote 20 has been added to read as follows: "Verify results as soon as possible, and follow up, as appropriate."

NEWBORN BILIRUBIN

- Screening for bilirubin concentration at the newborn visit has been added.
- Footnote 21 has been added to read as follows: "Confirm initial screening was accomplished, verify results, and follow up, as appropriate. See 'Hyperbilirubinemia in the Newborn Infant ≥35 Weeks' Gestation: An Update With Clarifications' (<http://pediatrics.aappublications.org/content/124/4/1193>)."

DYSLIPIDEMIA

- Screening for dyslipidemia has been updated to occur once between 9 and 11 years of age, and once between 17 and 21 years of age (to be consistent with guidelines of the National Heart, Lung, and Blood Institute).

SEXUALLY TRANSMITTED INFECTIONS

- Footnote 29 has been updated to read as follows: "Adolescents should be screened for sexually transmitted infections (STIs) per recommendations in the current edition of the AAP Red Book: Report of the Committee on Infectious Diseases."

HIV

- A subheading has been added for the HIV universal recommendation to avoid confusion with STIs selective screening recommendation.
- Screening for HIV has been updated to occur once between 15 and 18 years of age (to be consistent with recommendations of the USPSTF).
- Footnote 30 has been added to read as follows: "Adolescents should be screened for HIV according to the USPSTF recommendations (<http://www.uspreventiveservicestaskforce.org/uspstf/uspshiv.htm>) once between the ages of 15 and 18, making every effort to preserve confidentiality of the adolescent. Those at increased risk of HIV infection, including those who are sexually active, participate in injection drug use, or are being tested for other STIs, should be tested for HIV and reassessed annually."

ORAL HEALTH

- Assessing for a dental home has been updated to occur at the 12-month and 18-month through 6-year visits. A subheading has been added for fluoride supplementation, with a recommendation from the 6-month through 12-month and 18-month through 16-year visits.
- Footnote 32 has been updated to read as follows: "Assess whether the child has a dental home. If no dental home is identified, perform a risk assessment (<http://www2.aap.org/oralhealth/docs/RiskAssessmentTool.pdf>) and refer to a dental home. Recommend brushing with fluoride toothpaste in the proper dosage for age. See 'Maintaining and Improving the Oral Health of Young Children' (<http://pediatrics.aappublications.org/content/134/6/1224>)."
- Footnote 33 has been updated to read as follows: "Perform a risk assessment (<http://www2.aap.org/oralhealth/docs/RiskAssessmentTool.pdf>). See 'Maintaining and Improving the Oral Health of Young Children' (<http://pediatrics.aappublications.org/content/134/6/1224>)."
- Footnote 35 has been added to read as follows: "If primary water source is deficient in fluoride, consider oral fluoride supplementation. See 'Fluoride Use in Caries Prevention in the Primary Care Setting' (<http://pediatrics.aappublications.org/content/134/3/626>)."

KEY

- = to be performed
- * = risk assessment to be performed, with appropriate action follow, if positive
- ← • → = range during which a service may be provided, with the symbol indicating the preferred age.

FOOTNOTES

Rev. 10/10
Rev. 10/14
Rev. 04/16
Rev. 07/17

1. If a child comes under care for the first time at any point on the schedule, or if any items are not accomplished at the suggested age, the schedule should be brought up-to-date at the earliest possible time.
2. A prenatal visit is recommended for parents who are at high risk, for first-time parents, and for those who request a conference. The prenatal visit should include anticipatory guidance, pertinent medical history, and a discussion of benefits of breastfeeding and planned method of feeding, per “The Prenatal Visit” (<http://pediatrics.aappublications.org/content/124/4/1227.full>).
3. Newborns should have an evaluation after birth, and breastfeeding should be encouraged (and instruction and support should be offered).
4. Newborns should have an evaluation within 3 to 5 days of birth and within 48 to 72 hours after discharge from the hospital to include evaluation for feeding and jaundice. Breastfeeding newborns should receive formal breastfeeding evaluation, and their mothers should receive encouragement and instruction, as recommended in “Breastfeeding and the Use of Human Milk” (<http://pediatrics.aappublications.org/content/129/3/e827.full>). Newborns discharged less than 48 hours after delivery must be examined within 48 hours of discharge, per “Hospital Stay for Healthy Term Newborns” (<http://pediatrics.aappublications.org/content/125/2/405.full>).
5. Screen, per “Expert Committee Recommendations Regarding the Prevention, Assessment, and Treatment of Child and Adolescent Overweight and Obesity: Summary Report” (http://pediatrics.aappublications.org/content/120/Supplement_4/S164.full).
6. Blood pressure measurement in infants and children with specific risk conditions should be performed at visits before age 3 years.
7. A visual acuity screen is recommended at ages 4 and 5 years, as well as in cooperative 3-year-olds. Instrument-based screening may be used to assess risk at ages 12 and 24 months, in addition to the well visits at 3 through 5 years of age. See “Visual System Assessment in Infants, Children, and Young Adults by Pediatricians” (<http://pediatrics.aappublications.org/content/137/1/e20153596>) and “Procedures for the Evaluation of the Visual System by Pediatricians” (<http://pediatrics.aappublications.org/content/137/1/e20153597>).

8. Confirm initial screen was completed, verify results, and follow up, as appropriate. Newborns should be screened, per “Year 2007 Position Statement: Principles and Guidelines for Early Hearing Detection and Intervention Programs” (<http://pediatrics.aappublications.org/content/120/4/898.full>).
9. Verify results as soon as possible, and follow up, as appropriate.
10. Screen with audiometry including 6,000 and 8,000 Hz high frequencies once between 11 and 14 years, once between 15 and 17 years, and once between 18 and 21 years. See “The Sensitivity of Adolescent Hearing Screens Significantly Improves by Adding High Frequencies” ([http://www.jahonline.org/article/S1054-139X\(16\)00048-3/fulltext](http://www.jahonline.org/article/S1054-139X(16)00048-3/fulltext)).
11. See “Identifying Infants and Young Children With Developmental Disorders in the Medical Home: An Algorithm for Developmental Surveillance and Screening” (<http://pediatrics.aappublications.org/content/118/1/405.full>).
12. Screening should occur per “Identification and Evaluation of Children With Autism Spectrum Disorders” (<http://pediatrics.aappublications.org/content/120/5/1183.full>).
13. This assessment should be family centered and may include an assessment of child social-emotional health, caregiver depression, and social determinants of health. See “Promoting Optimal Development: Screening for Behavioral and Emotional Problems” (<http://pediatrics.aappublications.org/content/135/2/384>) and “Poverty and Child Health in the United States” (<http://pediatrics.aappublications.org/content/137/4/e20160339>).
14. A recommended assessment tool is available at <http://www.ceasar-boston.org/CRAFFT/index.php>.
15. Recommended screening using the Patient Health Questionnaire (PHQ)-2 or other tools available in the GLAD-PC toolkit and at <http://www.aap.org/en-us/advocacy-and-policy/aap-health-initiatives/Mental-Health/Documents/MHScreeningChart.pdf>.)
16. Screening should occur per “Incorporating Recognition and Management of Perinatal and Postpartum Depression Into Pediatric Practice” (<http://pediatrics.aappublications.org/content/126/5/1032>).
17. At each visit, age-appropriate physical examination is essential, with infant totally unclothed and older children undressed and suitably draped. See “Use of Chaperones During the Physical Examination of the Pediatric Patient” (<http://pediatrics.aappublications.org/content/127/5/991.full>).
18. These may be modified, depending on entry point into schedule and individual need.

19. Confirm initial screen was accomplished, verify results, and follow up, as appropriate. The Recommended Uniform Newborn Screening Panel (<http://www.hrsa.gov/advisorycommittees/mchbadvisory/heritabledisorders/recommendpanel/uniformscreeningpanel.pdf>), as determined by The Secretary's Advisory Committee on Heritable Disorders in Newborns and Children, and state newborn screening laws/regulations (<http://genes-r-us.uthscsa.edu/sites/genes-r-us/files/nbsdisorders.pdf>) establish the criteria for and coverage of newborn screening procedures and programs.
20. Verify results as soon as possible, and follow up, as appropriate.
21. Confirm initial screening was accomplished, verify results, and follow up, as appropriate. See "Hyperbilirubinemia in the Newborn Infant ≥ 35 Weeks' Gestation: An Update With Clarifications" (<http://pediatrics.aappublications.org/content/124/4/1193>).
22. Screening for critical congenital heart disease using pulse oximetry should be performed in newborns, after 24 hours of age, before discharge from the hospital, per "Endorsement of Health and Human Services Recommendation for Pulse Oximetry Screening for Critical Congenital Heart Disease" (<http://pediatrics.aappublications.org/content/129/1/190.full>).
23. Schedules, per the AAP Committee on Infectious Diseases, are available at http://redbook.solutions.aap.org/SS/Immunization_Schedules.aspx. Every visit should be an opportunity to update and complete a child's immunizations.
24. See "Diagnosis and Prevention of Iron Deficiency and Iron-Deficiency Anemia in Infants and Young Children (0–3 Years of Age)" (<http://pediatrics.aappublications.org/content/126/5/1040.full>).
25. For children at risk of lead exposure, see "Low Level Lead Exposure Harms Children: A Renewed Call for Primary Prevention" (http://www.cdc.gov/nceh/lead/ACCLPP/Final_Document_030712.pdf).
26. Perform risk assessments or screenings as appropriate, based on universal screening requirements for patients with Medicaid or in high prevalence areas.
27. Tuberculosis testing per recommendations of the AAP Committee on Infectious Diseases, published in the current edition of the AAP *Red Book: Report of the Committee on Infectious Diseases*. Testing should be performed on recognition of high-risk factors.
28. See "Integrated Guidelines for Cardiovascular Health and Risk Reduction in Children and Adolescents" (http://www.nhlbi.nih.gov/guidelines/cvd_ped/index.htm).
29. Adolescents should be screened for sexually transmitted infections (STIs) per recommendations in the current edition of the AAP *Red Book: Report of the Committee on Infectious Diseases*.

30. Adolescents should be screened for HIV according to the USPSTF recommendations (<http://www.uspreventiveservicestaskforce.org/uspstf/uspshivi.htm>) once between the ages of 15 and 18, making every effort to preserve confidentiality of the adolescent. Those at increased risk of HIV infection, including those who are sexually active, participate in injection drug use, or are being tested for other STIs, should be tested for HIV and reassessed annually.
31. See USPSTF recommendations (<http://www.uspreventiveservicestaskforce.org/uspstf/uspscerv.htm>). Indications for pelvic examinations prior to age 21 are noted in “Gynecologic Examination for Adolescents in the Pediatric Office Setting” (<http://pediatrics.aappublications.org/content/126/3/583.full>).
32. Assess whether the child has a dental home. If no dental home is identified, perform a risk assessment (<http://www2.aap.org/oralhealth/docs/RiskAssessmentTool.pdf>) and refer to a dental home. Recommend brushing with fluoride toothpaste in the proper dosage for age. See “Maintaining and Improving the Oral Health of Young Children” (<http://pediatrics.aappublications.org/content/134/6/1224>).
33. Perform a risk assessment (<http://www2.aap.org/oralhealth/docs/RiskAssessmentTool.pdf>). See “Maintaining and Improving the Oral Health of Young Children” (<http://pediatrics.aappublications.org/content/134/6/1224>).
34. See USPSTF recommendations (<http://www.uspreventiveservicestaskforce.org/uspstf/uspsdnch.htm>). Once teeth are present, fluoride varnish may be applied to all children every 3–6 months in the primary care or dental office. Indications for fluoride use are noted in “Fluoride Use in Caries Prevention in the Primary Care Setting” (<http://pediatrics.aappublications.org/content/134/3/626>).
35. If primary water source is deficient in fluoride, consider oral fluoride supplementation. See “Fluoride Use in Caries Prevention in the Primary Care Setting” (<http://pediatrics.aappublications.org/content/134/3/626>).

902.2 Minimum Standards for Screening Components during the Preventive Health Visits

Required Components are specified here and in the chart and footnotes of the American Academy of Pediatrics Recommendations for Preventive Pediatric Health Care (AAP Periodicity Schedule).

Visit Components:

Every periodic health supervision (well-child) visit must include:

1. A comprehensive health, psycho-social and developmental history;
2. Documentation of vital signs;
3. An unclothed comprehensive physical examination (unclothed means to the extent necessary to conduct a full, age-appropriate examination);
4. Assessment of growth and nutritional status;
5. Assessment of immunization status and provision of appropriate immunizations. (Use the Advisory Committee on Immunization Practices (ACIP) schedules);
6. Screening for vision, hearing, and development, as per AAP guidance;
7. Laboratory testing where appropriate to age and exam findings, and in line with AAP guidance. (Some testing, if not bundled, may be covered under other programs i.e. Physician Services, DSPS, etc. Please follow those programs' guidelines for reimbursement.);
8. Oral health screening, preventive counseling, and referral to a dentist for ongoing dental care;
9. Screening for and if suspected, reporting of child abuse and neglect;
10. Anticipatory guidance (Health Education); and
11. Referrals /follow-ups where appropriate based on history and exam findings.

Rev. 10/15
Rev. 07/16

CDC Positive Parenting Tips (handouts English and Spanish to download for families) at:
<http://www.cdc.gov/ncbddd/child/infants.htm>

Immunization schedule (Recommended Immunization Schedule, 0-18 years)

<http://aapredbook.aappublications.org/site/resources/izschedules.xhtml>

A. Age

Calculate the child's age. If a child comes under care for the first time at any point on the schedule, or if any items were not accomplished at the suggested age, the member's visit should be brought up to date.

B. History

Initial history: All ages: The history may be obtained at the time of the visit from the parent/guardian or it may be obtained through a form or checklist sent to the parent/guardian prior to the visit for completion.

History must contain, but is not limited to:

1. Present health status and past health history of member;
2. Developmental information;
3. Allergies and immunization history - allergies must be clearly and easily found in records;
4. Family history;
5. Dietary (nutrition) history;
6. Risk assessment of lead exposure; and
7. Refusal of Care documentation form (as necessary).

Documentation: Initial health history is recorded in the medical record.

Interval history: All ages: For known patients, the age-specific history may be confined to the interval since the previous evaluation. The provider must review and supplement these histories at the time of the patient's examination. Include nutrition history.

Documentation: Evidence of review.

C. Measurements

1. **Assessment of Growth:**

All ages: Growth must be measured, plotted on a graph, and recorded as outlined below.

Children younger than 2 years: Age, weight, length, and head circumference are required. Measurements should be plotted on the appropriate World Health Organization (WHO) growth chart(s).

Children 2 years of age and older: Age, weight, height, and BMI are required. Measurements must be plotted on the appropriate Centers for Disease Control and Prevention (CDC) growth chart(s). The BMI number must be plotted on the BMI-for-age growth chart to obtain a BMI percentile ranking.

The CDC and WHO growth charts are available at the following website:
<http://www.cdc.gov/growthcharts/>

Documentation: All measurements in numerical values must be recorded and plotted as indicated. All measurements outside of normal range must have an intervention. Interventions following assessments, as suggested by the CDC, are also acceptable. Please refer to Appendix F for the correct BMI diagnosis codes to be recorded on the claim. The diagnosis code must align with the BMI percentile plotted on the growth chart.

Fee For Service (FFS) EPSDT providers should not link the preventive health visit code to the BMI percentile diagnosis code on the claim.

Rev. 10/13
Rev. 07/14
Rev. 10/14

2. Blood Pressure Assessment:

Children younger than 3 years: Infants and children with specific risk conditions need a blood pressure assessment. See the Bright Futures Guidance (BFG).

Children 3 years and older: Blood pressure assessment is performed at every visit.

Documentation: All measurements in numerical values must be recorded. All measurements outside of the normal range must have an intervention.

NOTE: Definitions for High Blood Pressure must follow the range published by the National High Blood Pressure Education Program in “The Fourth Report on the Diagnosis, Evaluation, and Treatment of High Blood Pressure in Children and Adolescents.”

http://www.nhlbi.nih.gov/files/docs/resources/heart/hbp_ped.pdf

The article, “Simple Table to Identify Children and Adolescents Needing Further Evaluation of Blood Pressure,” can be found in Pediatrics 2009; 123; e972-e974; David C. Kaelber and Frieda Pickett

<http://pediatrics.aappublications.org/cgi/reprint/123/6/e972>

D. Sensory Screening

1. Vision Procedure:

Children from birth to 3 years of age: A Vision Risk Assessment is needed at every visit. This risk assessment includes: ocular history, vision assessment, external inspection of the eyes and lids, ocular motility assessment, pupil and red reflex examination.

If the risk assessment is positive, refer to an ophthalmologist.

Children 3 years and older: A Vision Screening is required at the 3, 4, 5, 6, 8, 10, 12, and 15 year old visits. (The routine screening at age 18 has been changed to a risk assessment). A Vision Risk Assessment should be performed at all other visits. Patients uncooperative with screening and with no history, nor signs/symptoms of problems, should be re-screened within 6 months. To test visual acuity, use age appropriate tests. BFG suggests the Snellen letter or Symbol E charts. The use of alternative tests (HOTV or Matching Symbol, Faye Symbol, Allen Pictures) should be considered for preschoolers.

If the risk assessment is positive, conduct a vision screening. If the vision screening is positive, refer to an ophthalmologist.

Rev. 10/13

Rev. 04/15

Rev. 10/14

Rev. 04/16

Reminder: If a child wears eyeglasses, assessment regarding the need for referral for optometric re-evaluation must be made based on screening with eyeglasses and the length of time since the last evaluation.

Documentation: Sensory Screening documentation consists of an age appropriate assessment, assessment results (normal or abnormal) and examinations performed and results (pass/fail) data. Appropriate follow up or referral is needed for results outside of the normal range.

2. Hearing Procedure:

Newborns: All newborns should receive a newborn hearing screening per the AAP “Year 2007 Position Statement: Principles and Guidelines for Early Hearing Detection and Intervention Programs”

(<http://pediatrics.aappublications.org/content/120/4/898.full>)

If the newborn does not pass the hearing screening, refer for a follow-up outpatient rescreening within one month. For newborns who do not pass the rescreening, refer to an audiologist.

Georgia’s [Early Hearing Detection and Intervention \(EHDI\) Program](#) is housed in the Georgia Department of Public Health along with the Newborn Metabolic Screening Program and the [Children 1st Program](#). These three programs maintain and support a comprehensive, coordinated, statewide public health screening and referral system. EHDI includes:

- Screening for hearing loss in the birthing hospital;
- Referral of newborns who do not pass the hospital screening for rescreening;
- Referral of newborns who do not pass the rescreening for diagnostic audiological evaluation; and
- Linkage to appropriate intervention for those babies diagnosed with hearing loss.

Refer to the [Georgia EHDI Program](#) (<http://dph.georgia.gov/EHDI>) for further guidance.

Infants and toddlers under age 2 years: These children should be monitored for auditory skills, middle ear status, and developmental milestones (surveillance).

Infancy and Early Childhood visits: Conduct a risk assessment at each preventive visit during the Infancy and Early Childhood years (from the three to five days visit through the 3 year old visit). If the risk assessment is positive, refer to an audiologist.

Middle Childhood and Adolescent visits: Conduct a risk assessment during the preventive visit at ages 7 years and 9 years. If the risk assessment is positive, refer to an audiologist.

Rev. 10/14
Rev. 07/16

Rev. 07/17

At the 4, 5, 6, 8 and 10 year visits: Appropriate universal hearing screening (objective) is required.

At the 11 years through 20 years visits: Screen with audiometry including 6,000 and 8,000 Hz high frequencies once between 11 and 14 years, once between 15 and 17 years, and once between 18 and 20 years. See “*The Sensitivity of Adolescent Hearing Screens Significantly Improves by Adding High Frequencies*” ([http://www.jahonline.org/article/S1054-139X\(16\)00048-3/fulltext](http://www.jahonline.org/article/S1054-139X(16)00048-3/fulltext))

Additional Guidance for Hearing Assessment Visits

Concerns identified during surveillance for children less than 2 years of age should be followed by performance of screening using a validated global screening tool (ASQ, PEDS, etc.). Those who do not pass the speech-language portion of the global screen or who have a caregiver concern should be referred immediately for further evaluation. Children with persistent middle ear effusions should be referred for otologic evaluation.

Older children who fail the risk assessment tool or screening should have appropriate intervention. Older children with persistent middle ear effusions should be referred for otologic evaluation.

Documentation: Sensory Screening documentation consists of an age appropriate assessment, assessment results (normal or abnormal) and examinations performed and results (pass/fail) data. Appropriate follow up or referral is needed for results outside of the normal range.

Patients uncooperative with screening and with no history, nor signs/symptoms of problems, should be re-screened within 6 months. This time frame is not appropriate for newborns.

E. Psychosocial/Behavioral Assessment and Developmental Surveillance

1. Surveillance:

Required for all ages: This assessment should occur with each clinical encounter with the child or adolescent. Comprehensive childhood surveillance of development includes activities that will document *social, emotional, communication, cognitive, and physical development* concerns (this content is listed at each health supervision visit in BFG under *Surveillance of Development*). Psychosocial/ behavioral surveillance will encourage activities and interventions to promote mental health and emotional well-being. See BFG Chapter 3.

Documentation: Evidence of surveillance.

Rev. 04/12
Rev. 07/14
Rev. 01/15

2. Developmental Screening:

Required at ages 9 months, 18 months, and 30 months:. This screening **must** be accomplished using one or more of the following recommended standardized developmental screening tools:

- Ages and Stages Questionnaire (ASQ) - 2 months to 5 years
- Ages and Stages Questionnaire - 3rd Edition (ASQ-3)
- Battelle Developmental Inventory Screening Tool (BDI-ST) – Birth to 95 months
- Bayley Infant Neuro-developmental Screen (BINS) - 3 months to 2 yrs
- Brigance Screens-II – Birth to 90 months
- Child Development Inventory (CDI) - 18 months to 6 years
- Infant Development Inventory – Birth to 18 months
- Parents' Evaluation of Developmental Status (PEDS) – Birth to 8 years
- Parents' Evaluation of Developmental Status - Developmental Milestones (PEDS-DM)

NOTE: Screening tools not included in the list are not acceptable. *It is important to note that standardized tools specifically focused on one domain of development [e.g. child's socio-emotional development (ASQ-SE) or autism (M-CHAT)] are not included in the list. The screening is anchored to recommendations related to global developmental screening using tools that identify risk for developmental, behavioral and social delays.*

Documentation: Evidence of the screening. Documentation in the medical record must include all of the following: a note indicating the date on which the screening was performed; a copy of the completed standardized tool used; and documented evidence of a screening result or screening score. If indicated, document the follow-up assessment, therapeutic interventions used, referrals made, and treatments received.

3. Autism Screening:

Required at ages 18 months and 24 months or any time parents raise a concern: The screening should be performed with an autism-specific screening tool. The Modified Checklist For Autism in Toddlers (MCHAT) is the recommended tool and downloadable at <https://m-chat.org>. The M-CHAT is a validated developmental screening tool for toddlers between 16 and 30 months of age, and should not be used for children younger than 16 months of age. The M-CHAT is designed to identify children who may benefit from a more thorough developmental and autism evaluation. The M-CHAT can be administered and scored as part of the preventive health visit, and also can be used by specialists or other professionals to screen for developmental delay and autism. The M-CHAT on-line version features the latest scoring system, Modified Checklist for Autism in Toddlers, Revised with Follow-Up (M-CHAT-R/F), making the results more sensitive in detecting developmental concerns.

Rev. 10/14
Rev. 01/15
Rev. 07/16
Rev. 07/17

Documentation: Evidence of the screening. Documentation in the medical record must include a note indicating the date on which the screening was performed; a copy of the screening tool used; and documented evidence of a screening result or screening score. If indicated, document the follow-up assessment, therapeutic interventions used, referrals made, and treatments received.

4. Tobacco, Alcohol, or Drug Use Assessment:

Required at 11 years through 20 years of age: At all adolescent (11-20 years) visits, pre-teens and teens should be asked about substance use.

The screening should be performed and documented or the child referred for care at any encounter when a parent raises a concern. AAP recommends using the CRAFFT screening tool (<http://www.ceasar-boston.org/CRAFFT/index.php>) for this assessment. A copy of the CRAFFT Screening Interview is available in Appendix P.

Documentation: Evidence of assessment. Document the screening tool used and the screening results (i.e., CRAFFT score). If indicated, document the follow-up assessment, therapeutic intervention used, referrals made, and treatments received.

5. Depression Screening:

Required at 12 years through 20 years of age: At all adolescent (12-20 years) visits, pre-teens and teens should be asked about depression.

AAP recommends using the Patient Health Questionnaire (PHQ)-2 (see Appendix P) http://www.cqaimh.org/pdf/tool_phq2.pdf or other tools available in the GLAD-PC toolkit.

The Bright Futures instructions for use of the PHQ 2 Questionnaire are available at <https://brightfutures.aap.org>.

Documentation: Evidence of assessment. Document the screening tool used and the screening results in the medical record. If indicated, document the follow-up assessment, therapeutic intervention used, referrals made, and treatments received.

Fee For Service EPSDT providers should link the depression screening procedure code (96127) to the applicable preventive health visit ICD-10 diagnosis code. The providers should not link a depression screening diagnosis code to the preventive health visit procedure code.

6. Maternal Depression Screening:

Required at the 1, 2, 4 and 6 month visits: At all visits (1, 2, 4, and 6 months), the mothers of newborn children should be asked about depression.

AAP recommends using the Edinburgh Postnatal Depression Scale (EPDS). A copy of the tool and instructions can be found at the following link: http://www2.aap.org/sections/scan/practicingsafety/toolkit_resources/module2/epds.pdf.

Rev. 10/14
Rev. 10/15
Rev. 04/16

Rev. 07/17

NOTE: Per the BF guidance, “Screening should occur per “Incorporating Recognition and Management of Perinatal and Postpartum Depression Into Pediatric Practice’ (<http://pediatrics.aapublications.org/content/126/5/1032>).”

Documentation: Evidence of assessment. Document the screening tool used and the screening results in the medical record. If indicated, document the follow-up assessment, therapeutic intervention used, referrals made, and treatments received.

If evidence of depression is documented, EPSDT providers may refer the mother to the Georgia Crisis and Access Line (GCAL). GCAL, a statewide toll free crisis hotline, provides access to resources and services to individuals in need of crisis management for mental health, addictive disease, and crisis services. GCAL can be reached 24 hours a day, 7 days per week at 1-800-715-4225 (GCAL) or accessed on the web at www.mygcal.com.

F. Physical Exam

1. Physical Exam:

All children: A comprehensive physical exam is required for periodic and catch-up visits. The physical examination is the cornerstone of pediatric evaluation. Per the Federal EPSDT policy guidelines, the physical examination must be an unclothed physical inspection (unclothed means to the extent necessary to conduct a full, age-appropriate examination) that checks the general appearance of the child to determine overall health status. This process can pick up obvious physical defects, including orthopedic disorders, hernias, skin diseases, genital abnormalities and oral health needs. Physical inspection includes an examination of all organ systems such as pulmonary, cardiac, and gastrointestinal.

Documentation: Findings on all organ systems must be documented in the medical record. A checklist type form allowing documentation of normal/abnormal findings may be utilized for recording the different organ systems. Abnormal findings require further evaluation, follow-up or parental counseling.

2. Nutrition:

The Federal EPSDT policy guidelines mandate assessment of nutritional status but state it can be accomplished during many different parts of the exam. “Accurate measurements of height and weight...are among the most important indices of nutritional status.” “If information suggests dietary inadequacy, obesity or other nutritional problems, further assessment is indicated.”

Documentation: Evidence of the assessment.

Rev. 10/14

Rev. 10/14
Rev. 01/15

G. Procedures

1. Newborn Screenings

a. Newborn Blood Screening

All infants under 4 months: Georgia law requires that every live born infant receive a metabolic screening for selective inherited disorders. The [Georgia Newborn Screening \(NBS\) Program](#) ensures that every newborn in Georgia is screened for 31 heritable disorders for prompt identification and treatment.

If the infant is discharged before twenty-four (24) hours after birth, a blood specimen shall be collected prior to discharge. In this case a second specimen shall be collected prior to 7 days of age.

Refer to the [Georgia NBS Program](#) for further guidance.

Documentation: All infants whose test results are unavailable at the time of the 3-5 day preventive visit must have a specimen collected immediately during this visit unless the results are pending due to processing.

The Newborn Blood Screening process may not be complete with results available before the first scheduled preventive health visit; however, these results should be actively tracked to completion and documented as soon as possible. If the results are outside the normal limits for a newborn screening disorder, the provider should ensure that the child receives prompt appropriate retesting and/or make a referral to an appropriate sub specialist.

Providers may access newborn screening results online through the State Electronic Notification Surveillance System (SendSS). Results are also available through the Georgia Public Health Laboratory's Newborn Screening eReports web portal.

Information regarding the SendSS registration process is available at:

<https://sendss.state.ga.us/sendss/login.screen>

Providers may register as a user of the Georgia Department of Public Health Laboratory's Newborn Screening eReports electronic portal by completing the [Newborn Screening eReports Web Portal Registration Form](#). The form is available at <http://dph.georgia.gov/sites/dph.georgia.gov/files/NBSeReportsWebPortalRegistrationform.pdf>

NOTE

Newborn Bilirubin: The screening for bilirubin concentration at the newborn visit has been added. See "Hyperbilirubinemia in the Newborn Infant > 35 Weeks' Gestation: An Update With Clarifications" (<http://pediatrics.aappublications.org/content/124/4/1193>)"

Rev. 10/14
Rev. 07/16

Rev. 10/12
Rev. 10/14

Rev. 07/17

Rev. 10/14
Rev. 01/15
Rev. 04/16
Rev. 07/16
Rev. 07/17

b. **Critical Congenital Heart Defect (CCHD) Screening**

Screening for critical congenital heart disease using pulse oximetry should be performed in newborns, after 24 hours of age, before discharge from the hospital, per the 2011 AAP statement, “Endorsement of Health and Human Services Recommendation for Pulse Oximetry Screening for Critical Congenital Heart Disease”

<http://pediatrics.aappublications.org/content/129/1/190.full>

CCHD was added to the Georgia newborn screening panel in 2014. In accordance with the Georgia Newborn Screening Program’s Policy and Procedure Manual, hospitals and birthing centers shall be equipped to conduct a critical congenital heart defect (CCHD) screening test on newborns using pulse oximetry. This screening can detect 14 common congenital heart defects in newborns which could result in disability and death. The CCHD screening should be performed in newborns before discharge from the hospital.

Documentation: Refer to the [Georgia Newborn Screening Program](#) for further guidance and documentation requirements.

2. **Immunizations**

All children: An immunization assessment is required for all children. This is a key element of preventive health services. Immunizations, if needed and appropriate, shall be given at the time of the preventive health visit. The Federal EPSDT policy guidelines mandate the use of the current ACIP schedule at <http://www.cdc.gov/vaccines>

Documentation: All immunizations (historic and current) must be documented in the medical record and recorded in the [Georgia Registry of Immunization Transactions and Services \(GRITS\)](#). Refusals must be documented with a signed document.

3. **Anemia Screening (Hematocrit and Hemoglobin)**

Anemia Screening Procedure:

At 12 months: Screening must be performed on all members with documentation of a hemoglobin or hematocrit measurement.

At 4 months: Selective screening may be performed on all preterm, low birth weight infants and those not on iron fortified formula.

Anemia Risk Assessment: An anemia risk assessment is required at the 4, 15, 18, 24, and 30 months visits, and annually starting at 3 years.

Documentation: Evidence of screening, if required, and/or test results as well as any further evaluation, treatment or counseling for results outside of the normal limits. Evidence of a risk assessment performed at the 4, 15, 18, 24, and 30 months visits, and annually thereafter starting at 3 years. This can be part of the nutrition assessment.

Rev. 07/17

Rev. 10/14

4. Lead Screening

Blood Lead Risk Assessment:

Rev. 10/14

The Blood Lead Risk Assessment is required at 6, 9 and 18 months and 3 to 6 years per the BFG periodicity schedule. A questionnaire, based on currently accepted public health guidelines, should be administered to determine if the child is at risk for lead poisoning. A recommended tool is the Georgia Healthy Homes and Lead Poisoning Prevention Program (GHHLPPP) Blood Lead Risk Assessment Questionnaire which can be found at <http://dph.georgia.gov/lead-screening-guidelines-children>

When using the questionnaire, a blood lead test should be done immediately if the child is at high risk (one or more “yes” or “I don’t know” answers on the lead risk assessment questionnaire) for lead exposure. Completing this questionnaire does not count as a blood lead screening.

Note: Assessment questions are not needed if a Blood Lead Level (BLL) screening (test) will be done at the visit.

Documentation: Risk assessment findings per the Bright Futures periodicity schedule with selective BLL screening (test) if there is a positive response or a change in risk.

Blood Lead Level (BLL) Screen:

A BLL screening (test) is required at 12 and 24 months.

Children between the ages of 36 months and 72 months: All children in this age range must receive one BLL screening IF they have not previously been tested for lead exposure.

Rev. 07/17

ALL **venous** sample lead screening tests conducted using any Magellan Diagnostic lead testing system should be laboratory analyzed by a properly accredited laboratory.

Documentation: Test results as well as any further evaluation, treatment or counseling for results outside of the normal limits must be documented in the medical record.

Note: Completing a lead risk assessment questionnaire **DOES NOT** count as a blood lead level screening and does not meet Medicaid requirements.

Rev. 04/14
Rev. 10/14
Rev. 07/15

NOTE: The Georgia Healthy Homes and Lead Poisoning Prevention Program (GHHLPPP) at 404-657-6534 has a Lead Risk Assessment Questionnaire that the provider may choose to use at <http://dph.georgia.gov/lead-screening-guidelines-children>

Resource: See Appendix A: Guidelines for Elevated BLL. These must be used if a child has results outside normal limits.

5. Tuberculin Risk Assessment and Test:

Rev. 10/14
Rev. 01/15
Rev. 10/15

Tuberculin Risk Assessment: Required at the 1, 6, 12, and 24 month visits then annually beginning at age 3 years. An assessment is given using a risk assessment questionnaire. The questionnaire should assess at least four (4) major risk factors:

- Contact with TB disease
- Foreign birth
- Foreign travel to TB endemic countries; and
- Household contact with TB

The AAP Bright Futures Guidelines for Health Supervision of Infants, Children, and Adolescents (3rd edition) recommends asking the following questions:

- 1) Was your child born in a country at high risk for tuberculosis?
- 2) Has your child traveled (had contact with resident populations) for longer than 1 week to a country a high risk for tuberculosis?
- 3) Has a family member or contact had tuberculosis or a positive tuberculin skin test?

Documentation: Validated risk assessment and responses. If positive on initial risk assessment questions, there should be a TB test recorded.

Resources: <https://brightfutures.aap.org/materials-and-tools/Pages/default.aspx>

Tuberculin Test

TB testing is not required at any age. The TB test is only administered to a child when questions are positive on the TB risk assessment or as the practitioner designates.

Documentation: If administered, a recorded Tuberculin skin test. If the practitioner needs to defer testing for reasons that cannot be validated with professionally written guidelines, consult with state TB experts. If a child cannot be given the screening test on this day, a follow-up visit is necessary. Document risk appropriate attempts to contact and re-schedule the appointment if the parent fails to keep the follow up appointment.

Rev. 01/15

If the TB skin test result for a high-risk child less than six (6) months is negative, please retest the child at six (6) months of age.

For more information about Tuberculosis in Georgia, including child risk screening forms (if the provider would like to use them), please contact (404) 657-2634 or visit <http://dph.georgia.gov/tuberculosis-tb-prevention-and-control>

Rev. 10/14

6. Dyslipidemia

Risk Assessment and selective screening when indicated: At the 2, 4, 6, 8 year and adolescence (12 through 16 year) visits.

Screening: Once between 9 and 11 years and once between 17 and 20 years: Universal screening is needed if not done previously in late adolescence (see periodicity schedule).

Documentation: Results of risk assessment and screening. Abnormal findings during assessment or screening require further evaluation, follow-up or parental counseling.

Resource: See AAP-endorsed 2011 guidelines from the National Heart Blood and Lung Institute, “Integrated Guidelines for Cardiovascular Health and Risk Reduction in Children and Adolescents”

(http://www.nhlbi.nih.gov/guidelines/cvd_ped/index.htm).

Rev. 10/14

Rev. 07/17

7. Sexually Transmitted Infections (STIs):

Risk Assessment: At the 11 through 20 year visits.

Screening: Adolescents should be screened for sexually transmitted infections (STIs) per recommendations in the current edition of the AAP *Red Book: Report of the Committee on Infectious Diseases*.”

Documentation: Results of risk assessment and screening. Abnormal findings during assessment or screening require further evaluation, treatment, follow-up, referral or parental counseling.

Rev. 10/14

Rev. 10/15

Rev. 07/17

8. Human Immunodeficiency Virus (HIV):

Risk Assessment: At the 11 through 14 year and 19 through 20 year visits.

Screening: Adolescents should be screened for HIV once between the ages of 15 and 18 years, according to the USPSTF recommendations (<http://www.uspreventiveservicestaskforce.org/uspstf/uspshivi.htm>), making every effort to preserve confidentiality of the adolescent. Those at increased risk of HIV infection, including those who are sexually active, participate in injection drug use, or are being tested for other STIs, should be tested for HIV and reassessed annually.

Documentation: Results of risk assessment and screening. Abnormal findings during assessment or screening require further evaluation, treatment, follow-up, referral or parental counseling.

Rev. 07/17

Rev. 10/15

The following in-office procedure codes are available for reimbursement for the routine HIV screening:

- 86701 – Analysis for antibody to HIV-1 virus
- 86702 – Analysis for antibody to HIV-2 virus
- 86703 – Analysis for antibody to HIV-1 and HIV-2 virus (Oraquick test)
- 87389 – Detection test for HIV-1 and HIV-2
- 87390 – Detection test for HIV-1
- 87391 – Detection test for HIV-2

Refer to the Part II Policies and Procedures For Independent Lab Services Program Manual.

9. Cervical Dysplasia (Pap Test)

Rev. 10/12
Rev. 10/14

Adolescents should not be routinely screened for cervical dysplasia prior to age 21 years.

Indications for pelvic exams prior to age 21 are noted in the “Gynecologic Examination for Adolescents in the Pediatric Office Setting” (<http://pediatrics.aappublications.org/content/126/3/583.full>)

H. Oral Health

Rev. 04/11
Rev. 10/14
Rev. 10/16
Rev. 01/17
Rev. 07/17

Every child should begin to receive oral health risk assessments by 6 months of age. (<http://pediatrics.aappublications.org/content/134/6/1224>)

The AAP recommends both the establishment of a dental home and the first dental exam no later than 12 months of age.

Assessing for a dental home should occur at the 12-month and 18-month through 6-year visits.

Risk Assessment: At the 6 and 9 month visits, conduct an oral health risk assessment (<http://www2.aap.org/oralhealth/docs/RiskAssessmentTool.pdf>). Encourage the parent to select a dental home.

For the 12, 18, 24, and 30 month visits, assess whether the child has a dental home. If no dental home is identified, perform a risk assessment and refer to a dental home. Recommend brushing with fluoride toothpaste in the proper dosage for age. See “Maintaining and Improving the Oral Health of Young Children” (<http://pediatrics.aappublications.org/content/134/6/1224>). For those at high risk, consider application of fluoride varnish for caries prevention.

At 3 and 6 years: Determine if the patient has a dental home. If not, a referral must be made. If a dental home has not been established, perform a risk assessment. For those at high risk, consider application of fluoride varnish for caries prevention.

Rev. 10/14
Rev. 10/16
Rev. 01/17
Rev. 07/17

Documentation: Document a referral or inability to refer to a dental home if one has not been established. Document the risk assessment if less than 6 years and dental home not established. Document dental appointment for older children and care per AAPD periodicity schedule. Any abnormal findings must have an appropriate intervention for all children.

An oral health risk assessment tool has been developed by the AAP/Bright Futures. This tool can be accessed at

(<http://www2.aap.org/oralhealth/docs/RiskAssessmentTool.pdf>)
(www.aap.org/oralhealth)

1. **Fluoride Varnish**

Rev. 04/16
Rev. 10/16

Once teeth are present, the application of fluoride varnish is required and may be applied every 3-6 months in the primary care or dental office for children between the ages of 6 months and 5 years. Indications for fluoride use are noted in the 2014 AAP clinical report “Fluoride Use in Caries Prevention in the Primary Care Setting”

(<http://pediatrics.aappublications.org/cgi/doi/10.1542/peds.2014-1699>)

Documentation: Evidence that fluoride varnish was applied once between the ages of 6 months and 5 years OR evidence that the provider addressed the fluoride varnish requirement and/or its importance with the parent.

2. **Fluoride Supplementation**

Rev. 07/17

Starting at tooth eruption, fluoridated toothpaste is recommended.

(<https://www.aap.org/en-us/about-the-aap/aap-press-room/pages/aap-recommends-fluoride-to-prevent-dental-caries.aspx>)

(http://www.aapd.org/media/policies_guidelines/g_fluoridetherapy.pdf)

If primary water source is deficient in fluoride, consider oral fluoride supplementation. See “Fluoride Use in Caries Prevention in the Primary Care Setting” (<http://pediatrics.aappublications.org/content/134/3/626>)

Risk Assessment: Required at the 6 through 12 month visits, 18 month through 30 month visits, and then annually beginning at 3 years through 16 years.

Documentation: Evidence that the provider addressed the fluoride supplementation requirement and/or its importance with the parent.

I. **Anticipatory Guidance Procedure:**

For all ages: Anticipatory guidance and health education must be offered. It is a federally required component of the EPSDT preventive health visit. Age appropriate topics/information must be presented during each visit. Providers may use oral and written information. Providers may refer to the specific guidance by age as listed in the Bright Futures Guidelines.

Rev. 04/11
Rev. 10/14

Note: Providers must document discussion or provision of guidance for all children on Injury and Violence Prevention. Bright Futures Guidelines recommend and DCH requires sleep positioning counseling and documentation of such at every visit for members aged birth to six (6) months. DCH encourages sleep positioning counseling through the nine (9) month visit.

Documentation: Topics or name of handout given.

J. Referral/Treatment noted between the PCP and Specialist or Follow-Up for Abnormal Values

All suspicious or abnormal findings identified during an EPSDT visit must be treated or be further evaluated. The provider must either treat (if qualified) or refer all members with abnormal findings.

Documentation: Evidence of appropriate plan of care, treatment or referral for all components, results, and over riding concerns.

903. Required Equipment and Required Location Where Services Are To Be Provided

In addition to an examination table and routine supplies, providers **must** have the following equipment in their office or clinic in order to complete the EPSDT preventive health exam:

1. Scale for weighing infants and other children;
2. Measuring board or appropriate device for measuring length or height in the recumbent position for infants and children up to the age of two (2) years;
3. Measuring board or accurate device for measuring height in the vertical position for children who are over two (2) years old;
4. Blood pressure apparatus with infant, child and adult cuffs;
5. Screening audiometer;
6. Eye charts appropriate for age of the child;
7. Ophthalmoscope and otoscope;
8. Developmental/Behavioral Health screening tools and supplies for the following:
 - Developmental Screening - *The required developmental screenings at ages 9 months, 18 months, and 30 months **must** be accomplished using one or more of the recommended standardized developmental screening tools specified in Section 902.2.*
 - Autism Screening
 - Depression Screening
 - Maternal Depression Screening
 - Tobacco, Alcohol, or Drug Use Assessment
9. Vaccines and immunization administration supplies; and
10. Lab supplies for appropriate lab tests/screenings.

The provider may also have a Centrifuge or other device for measuring hematocrit or hemoglobin.

904. Periodic, Catch-up and Interperiodic Visits

Rev. 10/10
Rev. 10/12
Rev. 04/14
Rev. 07/14
Rev. 10/14
Rev. 01/16
Rev. 07/17

The Georgia Department of Community Health, Division of Medicaid adopted the updated 2017 Bright Futures Periodicity Schedule and the schedule's components as the guidelines for each EPSDT preventive health visit. Please use these guidelines, the following tables and the EPSDT HIPAA referral codes (See Section 911) when billing for the EPSDT visit.

Table A: Use this table when billing for the EPSDT periodic visits of children who are on time for their visits according to the updated 2017 Bright Futures Periodicity schedule. One visit from each sequence may be billed.

Table B: Use this table when billing for the EPSDT periodic visits of children who have missed one or more of their EPSDT periodic visits according to the updated 2017 Bright Futures Periodicity schedule and need to get caught up with the Periodicity schedule.

Table C: Use this table when billing for the EPSDT interperiodic visits of children who are up to date on their periodic visits but have a medical necessity for another visit: i.e. referred to the EPSDT provider because of a suspected problem by a health, developmental, or educational professional who comes into contact with the child outside of the formal health care system or a need identified by the provider or parent.

Note: *Children in state custody (foster care) may require more frequent EPSDT services. Effective March 3, 2014, all children in state custody were transitioned to Medicaid managed care.*

Table A

On Time EPSDT Periodic Visit Procedure Codes

Rev. 07/11
Rev. 10/11
Rev. 04/12
Rev. 03/13
Rev. 01/14
Rev. 04/14
Rev. 07/14
Rev. 10/14
Rev. 01/15
Rev. 07/15
Rev. 10/15
Rev. 01/16
Rev. 04/16
Rev. 07/16

Use the preventive visit codes (99381-99385, 99391-99395) for Medicaid-eligible and PeachCare for Kids® (PCK)-eligible children. All preventive visits must be coded with the EP modifier (Refer to Table A) and appropriate diagnosis code (Refer to Table A-2). The 25 modifier must be included when a vaccine is administered during the preventive visit. A preventive visit that is not performed as specified in the periodicity schedule should be coded as a catch-up visit (Refer to Table B.) Catch-up visits are only available for children younger than three (3) years of age.

If an abnormality/ies is encountered or a preexisting problem is addressed during the EPSDT Periodic visit, and if the problem/abnormality is significant enough to require additional work to perform the key components of a problem-oriented E/M (evaluation and management) service, then the appropriate Office/Outpatient code 99211 or 99212 should also be reported. If the member is a new patient, *defined as one who has not received any EPSDT services (face-to-face services reported with a CPT code) from a practitioner or any practitioner within the same group practice of the exact same specialty or subspecialty within the past 3 years*, code the EPSDT preventive visit using the 9938x codes. If the member is an established patient, *defined as one who has received an EPSDT service from a practitioner or any practitioner within the same group practice of the same specialty or subspecialty within the past 3 years*, code the EPSDT preventive visit using the 9939x codes. Use the 99211 or 99212 code for the office visit component. (There is a reimbursement rate differential for PCK's members as identified in Table C.)

Modifier EP and 25 should be added to the Office/Outpatient code to indicate that a significant, separately identifiable Evaluation and Management service was provided by the same EPSDT provider on the same day as the EPSDT Periodic visit. The appropriate EPSDT Periodic visit code is additionally reported. If an abnormality/ies is encountered use the appropriate HIPAA diagnosis code which relates to the medical service(s) provided.

Other helpful information

The blood lead level screening is due at the 12 and 24 month preventive visits and the preventive visit will not be reimbursed without documentation that the blood lead level screening occurred. Providers must bill CPT code 36415 or 36416 with ICD-10 diagnosis code Z13.88 to signify blood lead level screening.

Reimbursement for immunization administration will be provided when vaccines are administered and properly coded on the claim by the provider.

The appropriate EPSDT Referral Code should be documented on the EPSDT claim when an EPSDT preventive visit has occurred. (See Section 911 – EPSDT HIPAA Referral Codes and Appendix K – EPSDT HIPAA Referral Code Examples.)

Table A

Sequence Numbers	HIPAA Procedure Code	HIPAA Modifier	Fee For Service Reimbursement	Periodic Exam to take place at stated age. Otherwise, code as Catch-Up Visit
1				<i>Newborn Visit (performed in the hospital)</i>
2	99381 or 99391	EP	\$67.38	3-5 days
3				by 1 month
4				2 months
5				4 months
6				6 months
7				9 months
8	99382 or 99392	EP	\$67.38	12 months
9				15 months
10				18 months
11				24 months

Effective July 1, 2015, physicians and physician extenders who are eligible for the HB 76 FY 2016 Primary Care Providers (PCP) rate increase will be reimbursed at the following rates, as indicated below in **Table A-1**, when the specified codes are billed for established Medicaid-eligible and PCK-eligible members.

Rev. 10/16

Effective July 1, 2016, physicians and physician extenders who are eligible for the HB 751 FY 2017 Primary Care Providers (PCP) rate increase will be reimbursed at the following rates, as indicated below in **Table A-1**, when the specified codes are billed for established Medicaid-eligible and PCK-eligible members.

Table A-1

Rev. 07/16

Rev. 10/16

Primary Care Providers (PCP) Rate Increases				
Age	Preventive Visit Code	HIPAA Modifier	HB 76 FY2016 Increased Reimbursement Rate	HB 751 FY2017 Increased Reimbursement Rate
Birth – 11 months	99381	EP	n/a	\$106.68
	99391	EP	\$86.47	\$96.08
12 months – 4 years	99392	EP	\$92.46	\$102.74
5 years – 11 years	99393	EP	\$92.17	\$102.41
12 years – 17 years	99394	EP	\$101.03	\$112.25
18 years – 20 years	99395	EP	\$103.24	\$114.71

Table A-2

Table A-2 displays the correct ICD-10 diagnosis codes to be used when billing preventive health visits.

Rev. 07/16

ICD-10 Code	At this Age
Z00.110	0 – 7 days
Z00.111	8 – 28 days
Z00.121 or Z00.129	29 days through 14 years
Z00.121 or Z00.129 Z00.00 or Z00.01	15 years through 17 years
Z00.00 or Z00.01	18 years through 20 years
Z02 – Z02.89	0 through 20 years

TABLE B

Catch-Up EPSDT Visit Procedure Codes

Use Table B-1 for Medicaid-eligible and PeachCare for Kids®-eligible children who have missed their EPSDT periodic visit(s). Catch-up preventive visits are only available for children younger than three (3) years of age. All catch-up preventive visits must be coded with the EP and HA modifiers (see Table B-1) and appropriate diagnosis code (see Table B-1). The 25 modifier must be included when a vaccine is administered during the catch-up preventive visit.

The Health Check provider must complete all missed components during this catch-up visit but may only bill for one catch-up visit (Example - Child presents to the Health Check provider at eight (8) months of age and has missed the four and six month periodic visits. All components of the four and six month periodic visits must be included during the present catch-up visit and documentation must be provided for all periodic visit components included during this catch-up visit.) The appropriate EPSDT Catch-Up visit procedure code (see Table B-1 above) along with the EP and HA modifiers and appropriate diagnosis code (see Table B-1) must be included on the claim.

If abnormalities are encountered or a preexisting problem is addressed during the EPSDT Catch-Up visit, and if the problem/abnormality is significant enough to require additional work to perform the key components of a problem-oriented E/M service, then the appropriate Office/Outpatient code 99211 or 99212 should also be reported. The provider should use the appropriate HIPAA diagnosis code that relates to the medical service(s) provided and include modifiers EP and 25.

If the member is a new patient, *one who has not received any EPSDT services (defined as face-to-face services reported with a CPT code) from a practitioner or any practitioner within the same group practice of the exact same specialty or subspecialty within the past 3 years*, code the EPSDT preventive visit using the 9938x codes. If the member is an established patient, *defined as one who has received an EPSDT service from a practitioner or any practitioner within the same group practice of the same specialty or subspecialty within the past 3 years*, code the EPSDT preventive visit using the 9939x codes. Use the 99211 or 99212 codes for the office visit component. (There is a reimbursement rate differential for PCK's members as identified in Table C.)

Other helpful information

The blood lead level screening is due at the 12 and 24 month preventive visits and the preventive visit will not be reimbursed without documentation that the blood lead level screening occurred. Providers must bill CPT code 36415 or 36416 with ICD-10 diagnosis code Z13.88 to signify blood lead level screening.

Reimbursement for immunization administration will be provided when vaccines are administered and properly coded on the claim by the provider.

The appropriate EPSDT Referral Code should be documented on the EPSDT claim when an EPSDT periodic visit has occurred. (See Section 911 – EPSDT HIPAA Referral Codes and Appendix K – EPSDT HIPAA Referral Code Examples.)

Tables B-1 and B-2 display the correct modifiers to be used when billing catch-up preventive health visits.

Effective July 1, 2016, physicians and physician extenders who are eligible for the HB 751 FY 2017 Primary Care Providers (PCP) rate increase will be reimbursed at the following rates, as indicated below in **Table B-2**, when the specified codes are billed for established Medicaid-eligible and PCK-eligible members.

Table B-1

HIPAA Proc Code	Age of Child	HIPAA Modifier	2nd modifier	Fee For Service Reimbursement
99381 or 99391	0 days through 11 months	EP	HA	\$67.38
99382 or 99392	12 months up to 3 years	EP	HA	\$67.38

Table B-2

Primary Care Providers Rate Increases					
HIPAA Proc Code	Age of Child	HIPAA Modifier	2nd modifier	HB 76 FY2016 Increased Reimbursement Rate	HB 751 FY2017 Increased Reimbursement Rate
99381	0 days through 11 months	EP	HA	n/a	\$106.68
99391				\$86.47	\$96.08
99392	12 months up to 3 years	EP	HA	\$92.46	\$102.74

Table B-3 displays the correct ICD-10 diagnosis codes to be used when billing catch-up preventive health visits.

Table B-3

ICD-10 Diagnosis Code	At this Age
Z00.110	0 – 7 days
Z00.111	8 – 28 days
Z00.121 or Z00.129	29 days to 3 years
Z02 – Z02.89	0 to 3 years

TABLE C

Interperiodic EPSDT Visit Procedure Codes

Per the Federal EPSDT policy guidelines, interperiodic screening, vision, hearing, and dental services which are medically necessary to determine the existence of suspected physical or mental illnesses or conditions are to be provided.

Rev. 07/11
Rev. 04/12
Rev. 01/14
Rev. 10/14
Rev. 01/15
Rev. 07/16

Use Table C-1 for Medicaid-eligible and PeachCare for Kids®-eligible children who are up to date on their periodic exams but have been referred because of a suspected problem to a qualified health provider by a health, developmental, or educational professional who comes into contact with the child outside of the formal health care system or a need identified by the provider or parent. The complete set of EPSDT preventive health visit components does not have to be performed. EPSDT providers must document the correct level of care when using office visit codes. The rate differential for PCK's members are shown in Table C-1.

Code the EPSDT interperiodic visit (99201-99203, 99211-99214) with the EP modifier. When vaccines are administered during the interperiodic visit, code the EPSDT interperiodic visit (99201-99203, 99212-99214) with the EP and 25 modifiers. The National Correct Coding Initiative (NCCI) does not allow reimbursement of the 99211 code when it is billed together with any of the vaccine administration codes (90460, 90471-90474).

Table C-1

HIPAA Procedure Code	HIPAA Modifier	HIPAA Diagnosis Code	Medicaid Fee For Service (FFS) Reimbursement	PeachCare for Kids® (PCK) Fee for Service (FFS) Reimbursement
99201 (new patient)	EP	*	\$29.67	\$41.20
99202 (new patient)	EP	*	\$40.70	\$71.16
99203 (new patient)	EP	*	\$62.71	\$103.01
99211 (established patient)	EP	*	\$17.46	\$17.46
99212 (established patient)	EP	*	\$29.67	\$41.54
99213 (established patient)	EP	*	\$40.70	\$69.11
99214 (established patient)	EP	*	\$62.71	\$102.49

*Use the appropriate HIPAA diagnosis code that relates to the medical service(s) provided.

TABLE C

Primary Care Providers Rate Increases

Rev. 07/16
Rev. 10/16

Effective July 1, 2015, physicians and physician extenders who are eligible for the HB 76 FY 2016 Primary Care Providers (PCP) Rate Increase will be reimbursed \$63.14, as indicated below in Table C-2 when procedure code 99213 is billed. This rate increase does not apply to PeachCare for Kids[®] members.

Effective July 1, 2016, physicians and physician extenders who are eligible for the HB 751 FY 2017 Primary Care Providers (PCP) rate increase will be reimbursed at the following rates, as indicated below in Table C-2, when the specified codes are billed for established Medicaid-eligible and PeachCare for Kids[®]-eligible members.

Table C-2

Rev. 10/16

Primary Care Providers Rate Increases				
HIPAA Procedure Code	HIPAA Modifier	HIPAA Diagnosis Code	HB 76 FY2016 Increased Reimbursement Rate	HB 751 FY2017 Increased Reimbursement Rate
99201 (new patient)	EP	*	n/a	n/a
99202 (new patient)	EP	*	n/a	\$71.33
99203 (new patient)	EP	*	n/a	\$103.80
99211 (established patient)	EP	*	n/a	n/a
99212 (established patient)	EP	*	n/a	\$41.63
99213 (established patient)	EP	*	\$63.14 ¹	\$70.15
99214 (established patient)	EP	*	n/a	\$103.72

*Use the appropriate HIPAA diagnosis code that relates to the medical service(s) provided.

¹This rate increase does not apply to PeachCare for Kids[®] members.

Table C

Interperiodic Vision and Hearing Screening

An enrolled provider may use the codes as indicated below in Table C-3 when billing for vision and/or hearing screening only. For example, a recheck of a failed hearing screening or a child who needs Form 3300 (Certificate of Vision, Hearing, Dental and Nutrition Screening) completed. Separate reimbursement is not allowed when these screenings are performed during the periodic preventive visit. Please see Table C-3 below.

Table C-3

HIPAA Procedure Code	HIPAA Modifier	Interperiodic Screening	ICD-10 Diagnosis Code	PCK and FFS Rate
99173	EP	Interperiodic Vision	Z01.00 or Z01.01 Or appropriate abnormal results code	\$5.62
V5008, 92551-92553, 92555-92556	EP	Interperiodic Hearing	Z01.10 or Z01.110 Or Z01.118 Or appropriate abnormal results code	\$5.62

Note: The Georgia Department of Public Health's Form 3300 has been revised to document a nutrition screening. More information and a copy of the form can be found at:

<http://www.gachd.org/Form3300Revised.pdf>

The determination of whether an interperiodic screen is medically necessary may be made by a health, developmental, or educational professional who comes into contact with the child outside of the formal health care system [e.g., State early intervention or special education programs, Head Start and day care programs, the Special Supplemental Food Program for Women, Infants and Children (WIC), and other nutritional assistance programs]. Providers may not bill interperiodic and periodic visits on the same day.

905. Immunizations

905.1 Recommended Immunization Schedule:

The Recommended Childhood Immunization Schedule should be used as the guideline for administering immunizations.

905.2 Delayed Immunizations:

Practitioners who begin the immunization process on children who are late or at times other than the recommended optimal immunization schedule may use recommendations from the Advisory Committee on Immunization Practices (ACIP) - see schedule for Children and Adolescents Who Start Late.

905.3 Vaccines for Children (VFC) Program:

It is recommended that all Health Check providers enroll in the Vaccines For Children program to provide immunizations to Medicaid eligible children whose ages are birth through eighteen (18) years of age. If the Health Check provider giving the EPSDT preventive health exam does not wish to participate in VFC, it is expected that they administer vaccines at the time of service and understand that only the administration fee will be reimbursed. The Vaccines For Children (VFC) program is a federally funded and state operated vaccine supply program that began October 1, 1994. The program supplies, at no cost to all public health and private health care providers, federally purchased vaccines to be administered to children in certain groups. Children eligible to receive VFC-provided vaccines include the following:

- A. children enrolled in Medicaid;
- B. children who do not have health insurance;
- C. children who are American Indian or Alaskan native; and
- D. children who have health insurance but for whom vaccines are not a covered benefit.

Note: PeachCare for Kids® members may receive state purchased vaccines.

Questions regarding enrollment and vaccine orders should be directed to the appropriate VFC program (1-800-848-3868).

Since vaccines are provided at no cost to the Health Check provider for children eighteen (18) years and younger, only administration costs are allowed to be submitted for reimbursement for vaccines administered to this age group.

905.4 Tdap and Meningococcal Requirements

Rev. 07/14

Beginning in the 2014-2015 academic school year (effective July 1, 2014), the Georgia Department of Public Health (DPH) Rule (511-2-2) requires all students born on or after January 1, 2002 entering or transferring into seventh (7th) grade and any “new entrant” entering into 8th-12th grades in Georgia must provide proof that the student has received one dose of Tdap (tetanus, diphtheria, pertussis) vaccine and one dose of meningococcal conjugate (MCV4) vaccine. DPH guidelines state that the student must have received the meningococcal vaccine on or after their 10th birthday for entry into the 7th grade. A student that received the meningococcal vaccine before their 10th birthday will need to be revaccinated on or after his/her 10th birthday. There is a minimum time interval of 8 weeks between the previous dose of the MCV4 vaccine and the newly required dose.

This law affects all public and private schools including, but not limited to, charter schools, community schools, juvenile court schools and other alternative school settings (excluding homeschool). “New Entrant” means any child entering any school in Georgia for the first time or entering after having been absent from a Georgia school for more than twelve months or one school year.

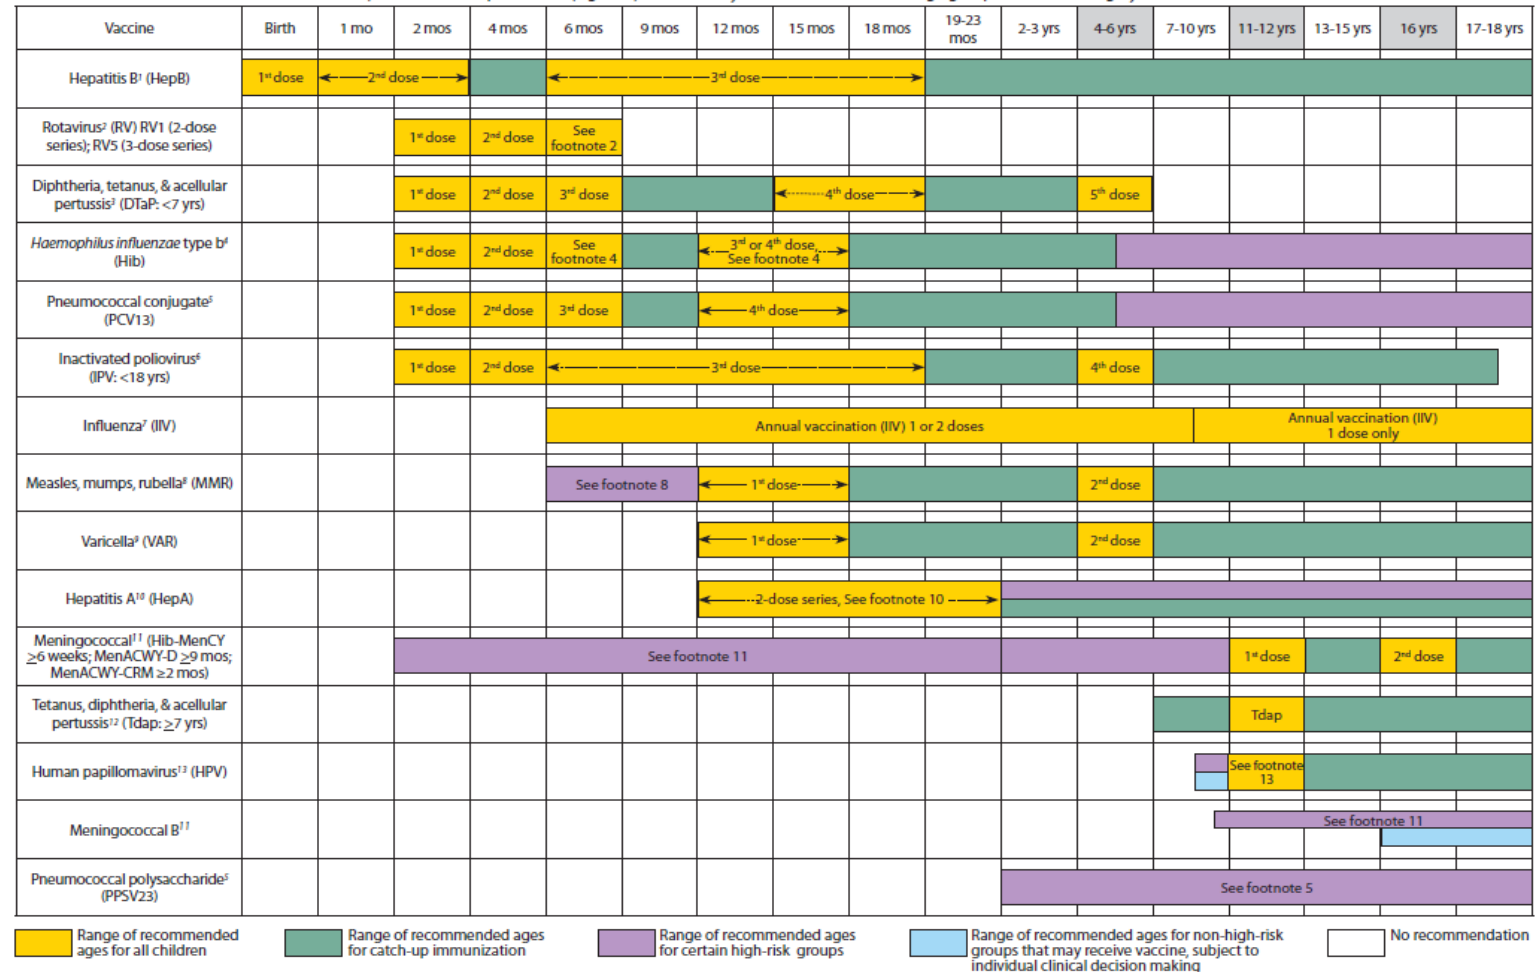

Recommended Immunization Schedule for Children and Adolescents Aged 18 Years or Younger, United States, 2017

(For those who fall behind or start late, see the catch-up schedule)

Figure 1. Recommended Immunization Schedule for Children and Adolescents Aged 18 Years or Younger—United States, 2017.

(FOR THOSE WHO FALL BEHIND OR START LATE, SEE THE CATCH-UP SCHEDULE (FIGURE 2)).

These recommendations must be read with the footnotes that follow. For those who fall behind or start late, provide catch-up vaccination at the earliest opportunity as indicated by the green bars in Figure 1. To determine minimum intervals between doses, see the catch-up schedule (Figure 2). School entry and adolescent vaccine age groups are shaded in gray.

NOTE: The above recommendations must be read along with the footnotes of this schedule.

Refer to footnotes at <http://www.cdc.gov/vaccines/schedules/downloads/child/0-18yrs-schedule.pdf>

FIGURE 2. Catch-up immunization schedule for persons aged 4 months through 18 years who start late or who are more than 1 month behind—United States, 2017.

The figure below provides catch-up schedules and minimum intervals between doses for children whose vaccinations have been delayed. A vaccine series does not need to be restarted, regardless of the time that has elapsed between doses. Use the section appropriate for the child's age. Always use this table in conjunction with Figure 1 and the footnotes that follow.

Children age 4 months through 6 years					
Vaccine	Minimum Age for Dose 1	Minimum Interval Between Doses			
		Dose 1 to Dose 2	Dose 2 to Dose 3	Dose 3 to Dose 4	Dose 4 to Dose 5
Hepatitis B ¹	Birth	4 weeks	8 weeks and at least 16 weeks after first dose. Minimum age for the final dose is 24 weeks.		
Rotavirus ²	6 weeks	4 weeks	4 weeks ²		
Diphtheria, tetanus, and acellular pertussis ³	6 weeks	4 weeks	4 weeks	6 months	6 months ³
<i>Haemophilus influenzae</i> type b ⁴	6 weeks	4 weeks if first dose was administered before the 1 st birthday. 8 weeks (as final dose) if first dose was administered at age 12 through 14 months. No further doses needed if first dose was administered at age 15 months or older.	4 weeks ⁴ if current age is younger than 12 months and first dose was administered at younger than age 7 months, and at least 1 previous dose was PRP-T (ActHib, Pentacel, Hiberix) or unknown. 8 weeks and age 12 through 59 months (as final dose) ⁴ • if current age is younger than 12 months and first dose was administered at age 7 through 11 months; OR • if current age is 12 through 59 months and first dose was administered before the 1 st birthday, and second dose administered at younger than 15 months; OR • if both doses were PRP-OMP (PedvaxHIB; Comvax) and were administered before the 1 st birthday. No further doses needed if previous dose was administered at age 15 months or older.	8 weeks (as final dose) This dose only necessary for children age 12 through 59 months who received 3 doses before the 1 st birthday.	
Pneumococcal ⁵	6 weeks	4 weeks if first dose administered before the 1 st birthday. 8 weeks (as final dose for healthy children) if first dose was administered at the 1 st birthday or after. No further doses needed for healthy children if first dose was administered at age 24 months or older.	4 weeks if current age is younger than 12 months and previous dose given at <7 months old. 8 weeks (as final dose for healthy children) if previous dose given between 7-11 months (wait until at least 12 months old); OR if current age is 12 months or older and at least 1 dose was given before age 12 months. No further doses needed for healthy children if previous dose administered at age 24 months or older.	8 weeks (as final dose) This dose only necessary for children aged 12 through 59 months who received 3 doses before age 12 months or for children at high risk who received 3 doses at any age.	
Inactivated poliovirus ⁶	6 weeks	4 weeks ⁶	4 weeks ⁶	6 months ⁶ (minimum age 4 years for final dose).	
Measles, mumps, rubella ⁸	12 months	4 weeks			
Varicella ⁹	12 months	3 months			
Hepatitis A ¹⁰	12 months	6 months			
Meningococcal ¹¹ (Hib-MenCY ≥6 weeks; MenACWY-D ≥9 mos; MenACWY-CRM ≥2 mos)	6 weeks	8 weeks ¹¹	See footnote 11	See footnote 11	
Children and adolescents age 7 through 18 years					
Meningococcal ¹¹ (MenACWY-D ≥9 mos; MenACWY-CRM ≥2 mos)	Not Applicable (N/A)	8 weeks ¹¹			
Tetanus, diphtheria; tetanus, diphtheria, and acellular pertussis ¹²	7 years ¹²	4 weeks	4 weeks if first dose of DTaP/DT was administered before the 1 st birthday. 6 months (as final dose) if first dose of DTaP/DT or Tdap/Td was administered at or after the 1 st birthday.	6 months if first dose of DTaP/DT was administered before the 1 st birthday.	
Human papillomavirus ¹³	9 years		Routine dosing intervals are recommended. ¹³		
Hepatitis A ¹⁰	N/A	6 months			
Hepatitis B ¹	N/A	4 weeks	8 weeks and at least 16 weeks after first dose.		
Inactivated poliovirus ⁶	N/A	4 weeks	4 weeks ⁶	6 months ⁶	
Measles, mumps, rubella ⁸	N/A	4 weeks			
Varicella ⁹	N/A	3 months if younger than age 13 years. 4 weeks if age 13 years or older.			

NOTE: The above recommendations must be read along with the footnotes of this schedule.

Refer to footnotes at <http://www.cdc.gov/vaccines/schedules/downloads/child/0-18yrs-schedule.pdf>

Figure 3. Vaccines that might be indicated for children and adolescents aged 18 years or younger based on medical indications

VACCINE ▼	INDICATION ►	Pregnancy	Immunocompromised status (excluding HIV infection)	HIV infection CD4+ count (cells/ μ L)		Kidney failure, end-stage renal disease, on hemodialysis	Heart disease, chronic lung disease	CSF leaks/cochlear implants	Asplenia and persistent complement component deficiencies	Chronic liver disease	Diabetes
				<15% of total CD4 cell count	\geq 15% of total CD4 cell count						
Hepatitis B ¹											
Rotavirus ²			SCID*								
Diphtheria, tetanus, & acellular pertussis ³ (DTaP)											
<i>Haemophilus influenzae</i> type b ⁴											
Pneumococcal conjugate ⁵											
Inactivated poliovirus ⁶											
Influenza ⁷											
Measles, mumps, rubella ⁸											
Varicella ⁹											
Hepatitis A ¹⁰											
Meningococcal ACWY ¹¹											
Tetanus, diphtheria, & acellular pertussis ¹² (Tdap)											
Human papillomavirus ¹³											
Meningococcal B ¹¹											
Pneumococcal polysaccharide ⁵											

 Vaccination according to the routine schedule recommended
  Recommended for persons with an additional risk factor for which the vaccine would be indicated
  Vaccination is recommended, and additional doses may be necessary based on medical condition. See footnotes.
  No recommendation
  Contraindicated
  Precaution for vaccination

*Severe Combined Immunodeficiency

NOTE: The above recommendations must be read along with the footnotes of this schedule.

Refer to footnotes at <http://www.cdc.gov/vaccines/schedules/downloads/child/0-18yrs-schedule.pdf>

Recommended Immunization Schedule for Adults Aged 19 Years or Older, United States, 2017

Rev. 01/10
Rev. 04/11
Rev. 04/12
Rev. 04/13
Rev. 04/14
Rev. 04/15
Rev. 04/16
Rev. 04/17

Figures 1 and 2 should be read with the footnotes that contain important general information and considerations for special populations.

Figure 1. Recommended immunization schedule for adults aged 19 years or older by age group, United States, 2017

Vaccine	19–21 years	22–26 years	27–59 years	60–64 years	≥ 65 years
Influenza ¹	1 dose annually				
Td/Tdap ²	Substitute Tdap for Td once, then Td booster every 10 yrs				
MMR ³	1 or 2 doses depending on indication				
VAR ⁴	2 doses				
HZV ⁵				1 dose	
HPV–Female ⁶	3 doses				
HPV–Male ⁶	3 doses				
PCV13 ⁷					1 dose
PPSV23 ⁷	1 or 2 doses depending on indication				1 dose
HepA ⁸	2 or 3 doses depending on vaccine				
HepB ⁹	3 doses				
MenACWY or MPSV4 ¹⁰	1 or more doses depending on indication				
MenB ¹⁰	2 or 3 doses depending on vaccine				
Hib ¹¹	1 or 3 doses depending on indication				

Recommended for adults who meet the age requirement, lack documentation of vaccination, or lack evidence of past infection

Recommended for adults with additional medical conditions or other indications

No recommendation

Refer to footnotes at <https://www.cdc.gov/vaccines/schedules/downloads/adult/adult-combined-schedule.pdf>

Figure 2. Recommended immunization schedule for adults aged 19 years or older by medical condition and other indications, United States, 2017

Vaccine	Pregnancy ^{1-6,9}	Immuno-compromised (excluding HIV infection) ^{3-7,11}	HIV infection CD4+ count (cells/ μ L) ^{3-7,9-11}		Asplenia, persistent complement deficiencies ^{7,10,11}	Kidney failure, end-stage renal disease, on hemodialysis ^{7,9}	Heart or lung disease, chronic alcoholism ⁷	Chronic liver disease ⁷⁻⁹	Diabetes ^{7,9}	Healthcare personnel ^{3,4,9}	Men who have sex with men ^{6,8,9}
Influenza ¹	1 dose annually										
Td/Tdap ²	1 dose Tdap each pregnancy	Substitute Tdap for Td once, then Td booster every 10 yrs									
MMR ³	contraindicated			1 or 2 doses depending on indication							
VAR ⁴	contraindicated			2 doses							
HZV ⁵	contraindicated				1 dose						
HPV-Female ⁶		3 doses through age 26 yrs									
HPV-Male ⁶		3 doses through age 26 yrs			3 doses through age 21 yrs						3 doses through age 26 yrs
PCV13 ⁷		1 dose									
PPSV23 ⁷		1, 2, or 3 doses depending on indication									
HepA ⁸	2 or 3 doses depending on vaccine										
HepB ⁹						3 doses					
MenACWY or MPSV4 ¹⁰	1 or more doses depending on indication										
MenB ¹⁰						2 or 3 doses depending on vaccine					
Hib ¹¹		3 doses post-HSCT recipients only			1 dose						

Recommended for adults who meet the age requirement, lack documentation of vaccination, or lack evidence of past infection

Recommended for adults with additional medical conditions or other indications

Contraindicated

No recommendation

Refer to footnotes at <https://www.cdc.gov/vaccines/schedules/downloads/adult/adult-combined-schedule.pdf>

906. Diagnostic, Treatment and Referral Services

Rev. 07/10
Rev. 10/14

All suspicious or abnormal findings identified during an EPSDT preventive health visit must be treated or be further evaluated.

When an EPSDT service is needed but not performed during the EPSDT preventive health visit, the child provider should be appropriately referred for diagnosis.

Rev. 04/12
Rev. 10/14

For non-CMO (care management organization) Medicaid and PeachCare for Kids[®] Fee-For Service (FFS) members, the screening provider must either treat (if qualified) or refer all members with abnormal findings. Members needing referrals must be appropriately referred to Medicaid or PeachCare for Kids[®] enrolled providers. For information on billing levels allowed for treatment during the EPSDT periodic and interperiodic visits, see section 1003. Billing Tips.

If the provider is not the member's EPSDT PCP, the provider must notify the member's PCP of the preventive health/interperiodic visit to discuss any clinical findings which require prompt medical attention.

Referral and prior authorization may be required for children who are assigned a PCP.

Rev. 01/10
Rev. 10/14

The level of treatment required should determine whether additional services are billed or provided during the EPSDT scheduled visit.

Rev. 07/10

907. Lead Risk Assessment and Screening

907.1 Purpose:

The purpose of screening for lead absorption is to identify children who have either symptomatic or asymptomatic lead poisoning and to intervene as quickly as possible to reduce their blood lead levels.

907.2 Lead Screening:

Rev. 07/08
Rev. 07/10
Rev. 10/14

- A. Since 1989, Federal law has required that children enrolled in Medicaid must have their blood lead level measured at 12 and 24 months of age.
- B. A blood lead test, *capillary* or *venous*, must be used when screening Medicaid-eligible children. A capillary Blood Lead Test that is elevated ($\geq 10\mu\text{g/dL}$ reported by a certified lab or $\geq 6\mu\text{g/dL}$ with the Lead Care II analyzer) must be confirmed with a repeat Blood Lead Test (confirmatory venous specimen is preferred) at a certified laboratory.
- C. ALL venous sample lead screening tests conducted using any Magellan Diagnostic lead testing system should be laboratory analyzed by a properly accredited laboratory.

Rev. 07/17

907.3 Lead Health Education and Anticipatory Guidance

Health education is a required component of screening services (EPSDT benefit in accordance with section 1905(r) of the Act) and includes anticipatory guidance.

Anticipatory Guidance regarding Lead Exposure

Anticipatory guidance should be provided to families when children are:

- A. 3-6 months of age and again at 12 months.
- B. Between the ages of 24 and 72 months at well-child visits and when a lead risk assessment questionnaire is administered.

The following topics should be covered with anticipatory guidance:

- A. Effects of lead poisoning on children
- B. Sources of lead poisoning
- C. Pathways of exposure (including placental exposure)
- D. How to prevent a child's exposure to lead hazards
- E. Appropriate schedule for testing children for lead poisoning

907.4 Lead Case Management

Rev. 10/12
Rev. 04/14

All children whose initial screening test shows an elevated blood lead level should follow the Georgia Healthy Homes and Lead Poisoning Prevention Program's (GHHLPPP) Case Management Guidelines. Georgia Department of Public Health (DPH) Lead Hazard Risk Assessors, under the guidance of the GHHLPPP, will perform an environmental lead risk assessment for all children with a confirmed blood lead level of ≥ 10 ug/dL, as well as provide education about low cost methods to reduce identified lead hazards. As a primary care provider, you will be notified by a DPH Lead Hazard Risk Assessor of the results of the environmental lead risk assessment and remediation recommendations.

Refer to the GHHLPPP Case Management Guidelines located in Appendix A, Guidelines in Screening and Reporting Elevated Blood Lead Levels.

908. Oral Health and Dental Services

Rev. 10/14

Per the Federal EPSDT policy guidelines, dental services must be provided to eligible members under twenty-one years of age. Dental services required under the EPSDT benefit include:

- Dental care needed for relief of pain, infection, restoration of teeth, and maintenance of dental health (provided at as early an age as necessary); and
- Emergency, preventive, and therapeutic services for dental disease that, if left untreated, may become acute dental problems or cause irreversible damage to the teeth or supporting structures.

In addition, medically necessary oral health and dental services, including those identified during an oral screening or a dental exam, are covered under the EPSDT benefit.

Refer to the Dental Services Program Policy and Procedures Manual.

Rev. 07/12

Dental providers should follow the American Academy of Pediatric Dentistry (AAPD) 2009 “Recommendations for Pediatric Oral Health Assessment, Preventive Services, and Anticipatory Guidance/Counseling” Schedule.

Recommendations for Pediatric Oral Health Assessment, Preventive Services, and Anticipatory Guidance/Counseling					
Since each child is unique, these recommendations are designed for the care of children who have no contributing medical conditions and are developing normally. These recommendations will need to be modified for children with special health care needs or if disease or trauma manifests variations from normal. The American Academy of Pediatric Dentistry (AAPD) emphasizes the importance of very early professional intervention and the continuity of care based on the individualized needs of the child. Refer to the text of this guideline for supporting information and references.

American Academy of Pediatric Dentistry (AAPD) 2009 “Recommendations for Pediatric Oral Health Assessment, Preventive Services, and Anticipatory Guidance/ Counseling”

FOOTNOTES

1. First examination at the eruption of the first tooth and no later than 12 months. Repeat every 6 months or as indicated by child’s risk status/susceptibility to disease. Includes assessment of pathology and injuries.

2. By clinical examination.
3. Must be repeated regularly and frequently to maximize effectiveness.
4. Timing, selection, and frequency determined by child's history, clinical findings, and susceptibility to oral disease.
5. Consider when systemic fluoride exposure is suboptimal. Up to at least 16 years.
6. Appropriate discussion and counseling should be an integral part of each visit for care.
7. Initially, responsibility of parent; as child matures, jointly with parent; then, when indicated, only child.
8. At every appointment; initially discuss appropriate feeding practices, then the role of refined carbohydrates and frequency of snacking in caries development and childhood obesity.
9. Initially play objects, pacifiers, car seats; when learning to walk; then with sports and routine playing, including the importance of mouthguards.
10. At first, discuss the need for additional sucking: digits vs pacifiers; then the need to wean from the habit before malocclusion or skeletal dysplasia occurs. For school-aged children and adolescent patients, counsel regarding any existing habits such as fingernail biting, clenching, or bruxism.
11. For caries-susceptible primary molars, permanent molars, premolars, and anterior teeth with deep pits and fissures; placed as soon as possible after eruption.

See the policies and procedures manual of the related programs for complete information. Provider Manuals relevant to EPSDT providers include, but may not be limited to:

- Advanced Nurse Practitioner Services
- Children's Intervention Services (CIS)
- Children's Intervention School Services (CISS)
- Dental Services
- Diagnostic Screening and Preventive Services (DSPS)
- Durable Medical Equipment (DME) Services
- Federally Qualified Health Center (FQHC) Services
- Georgia Pediatric Program (GAPP)
- Hospice Services
- Hospital Services
- Medicaid Medicaid/PeachCare for Kids® Provider Billing Manuals
- Nurse Midwifery Services
- Orthotic and Prosthetic Services
- Pharmacy Services
- Physician Assistant Services
- Physician Services
- Rural Health Clinic (RHC) Services
- Vision Care Services

Provider Manuals are available for downloading. Contact DXC Technology (DXC) at 1-800-766-4456 or visit the website at www.mmis.georgia.gov for more information.

910. Summary of Non-covered Services

Non-Covered Services include:

Screenings performed outside the provider's office or clinic.

Services provided in a manner inconsistent with the provisions of this manual.

911. EPSDT Profile (Appointment Tracking System)

The purpose of the EPSDT Appointment Tracking System is to track enrolled Fee-For-Service children eligible for services and to assist providers in conducting and documenting outreach and follow-up activities to EPSDT families and children.

The EPSDT Appointment Tracking System fully supports the State's goals of providing appropriate and continuing screening and treatment services to Georgia's children and of preventing more costly health problems by encouraging regular health care.

This system provides immediate access to medical and dental information on EPSDT members through online inquiry and provides a reminder call system at no cost to the EPSDT provider. These capabilities enhance the control and operation of the EPSDT program and allow information gathering to support research and program development.

In collaboration with the monthly EPSDT roster (Periodic Screenings Due Report), the EPSDT Profile (Appointment Tracking System) provides:

1. Member's demographic information in addition to the last dates for Hearing (Interperiodic Hearing), Vision (Interperiodic Vision), EPSDT Medical and Dental screenings.
2. Detailed information on the member's entire EPSDT history. This allows the provider to view the member's entire EPSDT history and document outreach attempts as a result of letters/rosters distributed. Based on the notice type distributed by DXC, all the provider has to do is document the member's response and a response date. For example, if the provider arranges a future appointment with the member, he/she will select scheduled appointment under the drop down box for response type and enter the date of the appointment under response date.
3. The Response Type options on the drop down box are:
 - a. Set Appointment (EPSDT preventive health screening visit)
 - b. Set Appointment (Dental)
 - c. Set Appointment (Blood Lead).
 - d. Screen Completed
4. The last section of the EPSDT Profile is the critical health information. EPSDT medical and dental providers are encouraged to enter information determined to be useful to another Health Care professional in the delivery of care to the member (For example, allergic to Penicillin).
5. If you need further instructions, feel free to click on the help link.

912. EPSDT HIPAA Referral Codes

The Centers for Medicare and Medicaid Services (CMS) defines an EPSDT referral as a member scheduled for another appointment with the EPSDT Provider or a referral to another provider for further needed diagnostic and treatment services as a result of at least one health problem identified during the EPSDT preventive health visit. Effective with HIPAA implementation, CMS and DCH require documentation of EPSDT Referral Codes when submitting EPSDT Screening Code Claims (See Appendix K for examples). When completing the Health Insurance Claim Form [CMS-1500], the EPSDT Referral Codes must be entered in the shaded area of box 24H. (See Appendix L)

Rev. 10/14
Rev. 04/15
Rev. 07/15

Example 1: If the EPSDT screening is normal, the referral code is NU (No follow up visit needed)

Example 2: If the EPSDT screening indicates the need for further diagnostic and treatment services and a follow-up visit is necessary, use the applicable referral code(s):

- AV Available, Not Used: Patient refused referral
- S2 Under Treatment: Patient is currently under treatment for health problem and has a return appointment.
- ST New Services Requested: Referral to another provider for diagnostic or corrective treatment/scheduled.

913. Access to Mental Health Services

Behavioral Health Link operates the Georgia Crisis and Access Line (GCAL) through a contract with the Department of Behavioral Health and Developmental Disabilities (DBHDD). To access mental health, addictive disease, and crisis services 24 hours a day, 7 days per week call 1-800-715-4225 (GCAL) or go to www.mygcal.com

Rev. 10/14

914. Services for Foster Care Children

As of March 3, 2014, children, youth, and young adults in state custody, children receiving adoption assistance and a select group of children under the Juvenile Justice system, were transitioned to Medicaid managed care under the Georgia Families 360° Program. Amerigroup Community Care is the single Care Management Organization (CMO) managing this population (see Appendix I). Children in state custody under the Kenny A. Consent Decree are required to have an EPSDT preventive health visit and a dental visit within 10 days of official transition to state custody. Unless otherwise noted, EPSDT services for all other children enrolled in the Georgia Families 360° Program should follow the Bright Futures Periodicity Schedule.

Rev. 07/14
Rev. 10/14
Rev. 10/15

PART II - CHAPTER 1000

Basis for Reimbursement

1001. Fee for Service Reimbursement Methodology

The Division will pay the lower of the lowest price regularly and routinely offered to any segment of the general public for the same service or items on the same date(s) of service, the lowest price charged to other third party payers, or effective with dates of service July 1, 2003, the statewide maximum allowable reimbursement which is 84.645% of Medicare's Resource Based Relative Value Scale (RBRVS) for 2000 for Region IV (Atlanta). All procedure codes recognized and adopted after the 2000 RBRVS are subject to the statewide maximum allowable reimbursement – 84.645% of the Region IV Medicare RBRVS in effect at the time the procedure code was adopted.

1002. Vaccines for Children

Since the Vaccines For Children (VFC) program supplies vaccines to providers at no cost to the provider for children birth through eighteen (18) years who have Medicaid, the Division will reimburse an administration fee only for immunizations given to Medicaid enrolled children of this age group. These fees cover the cost of administering the immunizations as well as any paper work involved (including an immunization or health certificate). Refer to Appendix C-2 for the reimbursement rates for the administration of vaccines provided by the VFC program for the Medicaid-eligible children birth through eighteen (18) years. Appendix C-2 also includes the reimbursement rate for the administration of state-purchased vaccines for the PeachCare for Kids® Fee for Service population, for children birth through age eighteen (18) years.

For members nineteen (19) years of age through twenty (20) years of age, VFC stock is not available. Providers must use their own stock of vaccines for these Medicaid eligible members. Health Check providers may include a vaccine administration code on their EPSDT claims when vaccines are administered to members nineteen (19) years of age through twenty (20) years of age. The Division will reimburse for the vaccine product and for vaccine administration. Billing tips for vaccine administration and the effective date for this change are located in Appendix C-1 of this manual and providers are strongly encouraged to follow those tips.

1003. Billing Tips

The following are tips to assist with billing for EPSDT screening services and interperiodic visits. All of the age appropriate EPSDT preventive health visit components (as identified in the updated 2017 Bright Futures periodicity schedule) must be completed for each screening visit and billed under one procedure code except where indicated. The EPSDT preventive health visit is reimbursed as a package of services. All preventive or well-child services, except normal newborn care in the hospital, must be billed under the EPSDT Program following the policies and procedures as outlined in this manual.

Rev. 01/10
Rev. 10/10
Rev. 07/13
Rev. 10/14
Rev. 10/15
Rev. 01/16
Rev. 07/17

1. Psychosocial/Behavioral Assessment

Psychosocial/Behavioral surveillances are performed at each complete EPSDT periodic screening visit and are not separate billable services.

2. Developmental Screenings

A developmental screening should be performed at the following periodic visits: 9, 18, and 30 months. Providers must bill code 96110 with the EP modifier and the appropriate ICD-10 diagnosis code in order to receive reimbursement for this screening.

Rev. 04/12
Rev. 07/12
Rev. 07/13
Rev. 04/14
Rev. 07/14
Rev. 04/15
Rev. 10/15
Rev. 01/16

ICD-10 Diagnosis Code
Z00.121 or Z00.129
Z02 – Z02.89

Only one (1) developmental screening will be reimbursed at each of these intervals. If the child is not seen at the 9, 18, or 30 month visit, a developmental screening should be performed during the catch-up visit for the missed periodic visit. This catch-up developmental screening should be billed, using the EP and HA modifiers with code 96110 and the appropriate ICD-10 codes. The provider can only bill one (1) catch-up developmental screening during any one (1) catch-up interval.

3. Autism Screenings

Rev. 07/17

Autism screenings should be performed at the 18 and 24 month periodic visits (or catch-up visits). Providers must bill code 96110 with the EP,UA or EP,UA,HA modifiers and the appropriate ICD-10 diagnosis code in order to receive reimbursement for this screening.

Autism screenings when performed outside of the Bright Futures requirements can also be reported. Providers must bill code 96110 with the EP,UA modifiers and the appropriate ICD-10 diagnosis code to receive reimbursement for the screening.

Rev. 01/16
Rev. 04/16
Rev. 07/17

4. **Brief Emotional/Behavioral Assessments**

Periodic Screening Visits

An annual depression screening should be performed for members ages 12 years through 20 years during the EPSDT periodic screening visit. An annual tobacco, alcohol, or drug use risk assessment should be performed for members ages 11 years through 20 years during the EPSDT periodic screening visit. When completed during the periodic visit, the depression screening and tobacco, alcohol, or drug use risk assessment can be reported as a brief emotional/ behavioral assessment. Providers must bill code 96127 with the EP modifier, POS 99 and the appropriate ICD-10 diagnosis code in order to receive reimbursement.

ICD-10 Diagnosis Code
Z00.121 or Z00.129
Z00.00 or Z00.01
Z02 – Z02.89

When both the depression screening and tobacco, alcohol, or drug use risk assessment are completed during the periodic visit, procedure code 96127 should be listed only once per claim and reported for two (2) units (one for the depression screening and a second one for the tobacco, alcohol, or drug use risk assessment).

Non-Periodic Screening Visits (Sick Visits)

Brief emotional /behavioral assessments, when performed during non-periodic screening visits, can also be reported for the following:

- depression screenings or tobacco, alcohol, or drug use risk assessments (outside of the BF requirements); AND
- emotional/behavioral assessments conducted for other conditions, such as ADHD, suicidal risk, anxiety, eating disorders, etc.

Brief emotional /behavioral assessments performed during non-periodic visits should be billed with the E/M office visit code (992xx) and reported with procedure code 96127, the appropriate ICD-10 diagnosis code, and should NOT include the EP modifier. The following POS codes should be used for the applicable programs and Categories of Service (COS): POS 11 - Physician (COS 430), Physician Assistant (COS 431), Nurse Practitioner (COS 740); and POS 71 – Diagnostic Screening and Preventive Services [DSPS](COS 790).

Procedure code 96127 is reimbursed at the current default rate.

5. The Georgia Medicaid program reimburses for many of the Diagnostic and Treatment services under other Medicaid programs.
6. EPSDT preventive health visits must be referred by or performed by the child's primary care practitioner in order for those services to be reimbursed. Only one (1) periodic preventive or well-child visit will be reimbursed per member at each age appropriate interval, as specified in the periodicity schedule (excluding foster care members).

Rev. 10/09
Rev. 01/10
Rev. 07/13
Rev. 10/14
Rev. 07/15

Rev. 04/11
Rev. 10/14
Rev. 07/15

7. Providers must perform the age appropriate hearing and vision screening in order to be reimbursed for the complete EPSDT preventive health exam. Providers may not refer the child to another provider for hearing and vision screening which is required at the time of the EPSDT preventive health visit.
8. When a visit is found to be medically necessary between periodic visit sequences, the EPSDT provider may be reimbursed by billing the appropriate interperiodic visit procedure code. An interperiodic visit cannot be billed on the same date of service as a complete EPSDT preventive health visit.
9. The laboratory tests due at the twelve (12) month visit for hematocrit and hemoglobin levels may be performed as in office tests at the time of the EPSDT preventive health visit by the PCP; or the blood sample may be obtained by the PCP and submitted to a Medicaid contracted lab; or the member may be sent to a Medicaid contracted lab for the blood draw and laboratory analysis. The PCP must document in the medical record which option was selected. These tests cannot be sent to a non participating laboratory for analysis.

10. **Federally required Blood Lead Level (BLL) screening**

Rev. 07/09
Rev. 10/09
Rev. 04/11
Rev. 04/14
Rev. 07/14
Rev. 10/14
Rev. 04/15
Rev. 10/15

If FFS EPSDT providers use private laboratories for BLL screening or perform BLL screening using an in office Lead Analyzer, the EPSDT provider cannot file a claim for reimbursement of the BLL test.

The Georgia Public Health Laboratory provides analysis of blood lead specimen and charges a laboratory fee. Fee for Service providers may submit claims to DCH for this fee if the blood sample is obtained by them during the visit and sent to the GPHL for analysis. To ensure accurate reimbursement, FFS providers must submit the CPT code 83655 with modifier EP and 90 or 91 on the CMS 1500 claim form along with the CPT codes 36415 or 36416 – modifier EP and ICD-10 diagnosis code Z13.88. Additional details regarding this process are contained in Appendix C-4.

11. **Vaccine Administration**

Rev. 07/11
Rev. 04/12
Rev. 04/13
Rev. 07/13
Rev. 01/14
Rev. 10/14

In order to receive the administration fee from the Division for administering federally or state purchased vaccines for children 0 – 18 years of age, the child must be a Medicaid or PeachCare for Kids® member. Since the federally or state purchased vaccines are provided at no cost to the provider, the Division will only reimburse an administration fee based upon the Division's maximum allowable rate. (See Chapter 1000, Section 1002). The vaccine's National Drug Code (NDC) is not required to be included on the EPSDT claim for reimbursement for the administration of federally or state purchased vaccines for children 0-18 years of age.

Beginning April 1, 2013, providers should bill any and all of the following appropriate vaccine administration codes, when administering VFC vaccines, as they apply: 90460, 90471, 90472, 90473, 90474. Additional details regarding the use of the vaccine administration codes are contained in Appendix C-1.

Rev. 04/14
Rev. 07/14
Rev. 10/14

EPSDT providers may bill the EPSDT Program for vaccines administered to members nineteen (19) years of age through twenty (20) years of age. Include the vaccine CPT code, diagnosis code, and NDC, along with the appropriate vaccine administration code(s) [90471, 90472, 90473, 90474] on the EPSDT claim. The Division will reimburse for the vaccine product (providers must use their own stock of vaccines) and for vaccine administration. Additional details regarding the use of the vaccine administration codes and the effective date for this change are contained in Appendix C-1.

Rev. 10/07
Rev. 10/10
Rev. 07/11
Rev. 04/14
Rev. 10/14
Rev. 07/15
Rev. 07/17

12. Office Visit Codes

Providers must use place of service (POS) code 99 when billing office visits for EPSDT preventive health screening services. All diagnostic x-ray, laboratory testing (except hematocrit, hemoglobin) and/or treatment services provided to the EPSDT member at the time of the preventive health visit, can be billed on the same CMS 1500 claim form as the EPSDT preventive health visit if the EPSDT provider uses a CMS 1500 form to bill Diagnostic and Treatment Services (i.e., Physician Services, Nurse Practitioner Services, etc.).

Effective May 1, 2015, paper claims are no longer accepted by DXC Technology. As part of the Georgia Paperless Initiative, providers are required to submit CMS 1500 claims electronically over the GAMMIS web portal. For more information regarding the Paperless Initiative, please access the web portal and review all related Banner Messages.

If an EPSDT provider uses a UB 04 to bill Diagnostic and Treatment services (i.e., Hospitals, Rural Health Clinics, etc.), they may also bill the EPSDT preventive health visit services on the UB 04.

Rev. 10/11
Rev. 04/12

13. School-Based Influenza Vaccine Clinics

Public Health providers must use place of service (POS) code 03 when billing the vaccine administration fee for Influenza vaccines administered during school-based Influenza vaccine clinics held within their county of jurisdiction. Only the Influenza vaccine administration will be reimbursed during these school-based Influenza vaccine clinics.

14. School-Based Telemedicine Services

Rev. 04/14
Rev. 10/14
Rev. 04/16

LEAs enrolled as Health Check providers to serve as telemedicine originating sites only will be allowed to bill the telemedicine originating site facility fee (procedure code Q3014). The LEA provider should report procedure code Q3014 along with the EP and GT modifiers, POS 03, and the appropriate ICD-10 diagnosis code(s). The diagnosis code(s) should be the same diagnosis code(s) listed on the distant site (rendering) provider's claim.

The rendering provider serving as the telemedicine distant site should report the E/M office visit code (992xx) along with the GT modifier (including any other applicable modifiers), the appropriate POS, and the ICD-10 diagnosis code(s).

In order for the originating site (LEA) provider to receive reimbursement for procedure code Q3014, a corresponding paid history claim from the distant site provider must be found in GAMMIS. The distant site provider's claim billed for the same member, same date of service, with an E/M office visit code (992xx), the same ICD-10 diagnosis code(s) and the GT modifier, will confirm that a telemedicine service was rendered. If no record of the E/M claim is found that aligns with the LEA provider's originating site claim, the originating site claim will suspend up to 30 days after submission in search of the E/M claim. If no record of an E/M claim is found within 30 days after submission of the LEA provider's originating site claim, reimbursement to the LEA provider will be denied. It is the responsibility of the LEA provider to contact the provider who rendered the distant site service to determine if the E/M visit was billed.

The telemedicine originating facility fee is reimbursed at the current DEFAULT rate.

15. Consultation Services

Rev. 07/14
Rev. 10/14

Effective July 1, 2014, providers enrolled in the EPSDT Program, may bill for reimbursement of the following office/outpatient consultation codes: 99241, 99242, 99243, 99244, 99245. The EP modifier must be added to the applicable code along any other applicable modifiers. A consultation service can be rendered once every three years.

16. Tobacco Cessation Counseling Services

Rev. 10/14
Rev. 04/15

Effective January 1, 2014, the Division began coverage of tobacco cessation counseling services to all Medicaid members. Providers enrolled in the EPSDT Program may bill 99406 and 99407 for the reimbursement of tobacco cessation counseling. The EP modifier must be added to the applicable code.

The tobacco cessation counseling must be rendered in a face-to-face setting with the member. Only two 12-week tobacco cessation treatment periods will be allowed per member per year. The provider must document the services in the member's medical record every 30 days during the 12-week treatment period.

Rev. 01/16

17. Incontinence Supplies

Incontinence supplies are covered for children ages 4 through 21 years who have an underlying medical condition that prevents control of the bowels or bladder. There must be documentation of the patient's diagnosis which supports the medical necessity of all items requested. Incontinence supplies must be prescribed by the physician who is responsible for treating the condition. Incontinence supplies are not covered for convenience. Providers may bill the following procedure codes: T4521-T4535, T4541, T4544 for the incontinence supplies. Prior approval (PA) is required. Refer to the Durable Medical Equipment (DME) Manual for further guidance.

18. Fluoride Varnish

Once teeth are present, the application of fluoride varnish is required and may be applied every 3-6 months in the primary care or dental office for children between the ages of 6 months and 5 years.

19. Other Procedure Codes

When billing for EPSDT screening services and interperiodic visits, only the procedure codes for those services found in this manual may be reimbursed under the EPSDT Program. Reimbursement for other services billable to Medicaid is covered under the program areas overseeing the delivery of those services.

20. NCCI MUE Limits

Providers are reminded to bill in compliance with the NCCI MUE limit for procedure codes and to check the MUE file, at minimum, on a quarterly basis for updates. Procedure codes submitted with frequencies greater than the allowed MUE will be denied according to the NCCI MUE regulations set by CMS.

Questions regarding Medicaid billing should be directed to Georgia Health Partnership (GHP) at 1-800-766-4456 or 'contact us' at www.mmis.georgia.gov

21. Other Reimbursement Rates

OTHER REIMBURSEMENT RATES		
<u>Procedure Code & Description</u>	<u>Modifier(s)</u>	<u>Current Default Rate</u>
96110 – Developmental Screening	EP	\$11.77
96110 – Autism Screening	EP UA or EP UA HA	\$11.77
96127 – Brief Emotional/ Behavioral Assessment	EP	\$4.55
Q3014 – Telehealth Originating Site Facility Fee	EP	\$20.52
99241 – Patient Office Consultation, typically 15 minutes	EP	\$48.05
99242 – Patient Office Consultation, typically 30 minutes	EP	\$78.78
99243 – Patient Office Consultation, typically 40 minutes	EP	\$100.50
99244 ¹ – Patient Office Consultation, typically 60 minutes	EP	\$139.12
99245 – Patient Office Consultation, typically 80 minutes	EP	\$180.61
99406 – Smoking and Tobacco Use Intermediate Counseling, Greater than 3 minutes up to 10 minutes	EP	\$10.51
99407 – Smoking and Tobacco Use Intensive Counseling, Greater than 10 minutes	EP	\$20.71

7/1/2017

Rev. 10/16

¹ Effective July 1, 2016, physicians and physician extenders who are eligible for the HB 751 FY 2017 Primary Care Providers (PCP) rate increase will be reimbursed \$180.26 when procedure code 99244 is billed for established Medicaid-eligible and PeachCare for Kids[®]-eligible members.

APPENDIX A

Guidelines in Screening and Reporting Elevated Blood Lead Levels

Rev. 04/12
Rev. 04/14

The mission of the Georgia Healthy Homes and Lead Poisoning Prevention Program (GHHLPPP) is to eliminate childhood lead poisoning in Georgia.

Screening Guidelines: Children

Rev. 04/12
Rev. 07/15
Rev. 07/16

Screening for lead poisoning helps identify children who need interventions to reduce their blood lead levels. Many children who may have been exposed to lead or who are at risk for lead poisoning go without being screened. This makes their chances of being harmed by lead greater. Parents and providers should know when a child should be tested for lead poisoning.

Guidelines in Screening and Reporting Elevated Blood Lead Levels:

Lead Screening Requirements & Medical Management Recommendations

(For Children ages 6 to 72 months)

RISK FACTORS ASSESSMENT QUESTIONNAIRE

---ask at these questions at the 6, 9, 12, 18, 24 months and 3, 4, 5, 6 years of age preventive visits---

1. Is your child living in or regularly visiting, or has your child lived in or regularly visited, a house or child care center built before 1978?
2. Does your child have a sibling or playmate that has or has had lead poisoning?
3. Does your child come in contact with an adult who works in an industry or has a hobby that uses lead (battery factory, steel smelter, stained glass, fishing or hunting)?
4. Does your child live near an active lead smelter, battery recycle plant, or other industry likely to release lead?
5. Does your child chew on or eat non-food items like paint chips or dirt?
6. Has your child spent more than 1 week in South or Central America, Africa, or Asia since their last blood test?
7. Does anyone in your family use ethnic folk remedies; use imported cosmetics or eat candies made outside the United States; or use pottery imported from South or Central America, Africa or Asia?

If the answer is YES or UNKNOWN to any of the questions, a blood lead test is necessary!

Test the blood of ALL Medicaid children for lead poisoning at 12 and 24 months of age AND children 3 to 6 years of age if never tested *regardless* of their risk factors.

**Table 1 - Lead Screening Requirements and Medical Management
Recommendations for Children ages 6 to 72 months**

**Test blood of all Medicaid children for lead poisoning at 12 and 24 months of age AND children 3 to 6 years of age if never tested regardless of their risk factors!
IT IS A FEDERAL REQUIREMENT**

Blood Lead Levels (BLL)	Recommended Medical and Case Management Actions							
	Confirmatory Blood Lead Test	Hospitalization	Chelation Therapy (A)	Blood Lead Level Re-test	Referrals (B)	History and Physical (C)	Lead Poisoning Education (D)	Reducing Exposure and Absorption (E)
< 10 µg/dL	No	No	No	within 1 year if BLL ≥ 5 µg/dL	No	No	YES	YES
10-14 µg/dL¹	within 1 day to 3 months, venous or capillary	No	No	see <i>Retest Chart</i> below	YES	YES	YES	YES
15-19 µg/dL	within 1 day to 3 months, venous or capillary	No	No	see <i>Retest Chart</i> below	YES	YES	YES	YES
20-44 µg/dL	within 1 day to 3 months, venous or capillary	No	No	see <i>Retest Chart</i> below	YES	YES	YES	YES
45-69 µg/dL	within 1 day to 1 month, venous or capillary	No, if home is lead-safe	YES	see <i>Retest Chart</i> below	YES	YES	YES	YES
70 µg/dL or higher	within 24-48 hours, venous only	YES MEDICAL EMERGENCY	YES	see <i>Retest Chart</i> below	YES	YES	YES	YES
THERE IS NO SAFE LEVEL OF LEAD IN THE BODY – DAMAGE CAUSED BY LEAD POISONING IS PERMANENT AND IRREVERSIBLE!								

¹ If the child's blood lead level persists between 10-14 ug/dL (2 blood lead tests 3 months apart), proceed according to the level of care for 15-19 ug/dL.

Explanation of Recommended Medical and Case Management Actions

(A) Chelation Therapy: if chelation therapy is indicated, the child should be immediately removed from the hazardous environment until the child's environment is made lead-safe; however, if the home is already lead-safe, the child may remain in the home unless hospitalization is indicated.

(B) Referrals: contact local health department and/or **GHHLPPP** to assist in case management and environmental investigations.

(C) History and Physical: take medical, environmental, and nutritional history, test for anemia and iron deficiency, assess neurological, psychosocial, and language development, screen all siblings under age 6, and evaluate risk of other family members, especially pregnant women.

- (D) Lead Poisoning Education:** discuss sources of lead, effects of lead, lead-based paint hazards associated with living in a pre-1978 and/or renovating a pre-1978 home. Discuss the effects of lead exposure during the prenatal care visits with the mother and during the child's preventive health periodic visits at 3, 6, and 12 months of age; and explain what blood lead levels mean and their significance. Lastly, contact **GHLPPP** for information.
- (E) Reducing Exposure and Absorption:** discuss damp cleaning to remove lead dust on surfaces, eliminating access to deteriorating lead paint surfaces, and ensuring regular meals which are low in fat and rich in calcium and iron; contact **GHLPPP** for materials.

ELEVATED BLOOD LEAD RE-TEST CHART

Use this chart to determine when to retest children who are *confirmed as lead-poisoned*. Venous testing is **strongly preferred**, but capillary testing is acceptable.

If the child's last confirmed BLL was...	and...	
	if the child's blood lead level HAS NOT DROPPED at least 3 µg/dl over a span of at least 3 months...	if the child's blood lead level HAS DROPPED at least 3 µg/dl over a span of at least 3 months...
	then test the child again in...	
10-14 µg/dL	3 months	6 months
15-19 µg/dL	3 months	3 months
20-24 µg/dL	1 month	2 months
25-44 µg/dL	1 month	1 month
45-69 µg/dL	1 month after chelation	1 month after chelation
≥70 µg/dL	1 month after chelation	1 month after chelation
Retesting should occur until the blood lead level is less than 10 µg/dL for six months, all lead hazards have been removed, housing is made lead-safe, and no new exposure exists.		

Department of Public Health, 2 Peachtree Street NW, 13th Floor, Atlanta, Ga, 30303,
Phone (404) 657-6534 | Toll Free 1-888-247-9054 | Fax (404) 463-4039

Lead Screening Guidelines for Children

Screening for lead poisoning helps identify children who need interventions to reduce their blood lead levels. Many children who may have been exposed to lead or who are at risk for lead poisoning go without being screened. This makes their chances of being harmed by lead greater. Parents and providers should know when a child should be tested for lead poisoning.

Medicaid and PeachCare for Kids

All children enrolled in Medicaid and PeachCare for Kids® should be tested for lead poisoning and offered certain services based on the following schedule:

Age	Lead Blood Test	Lead Risk Assessment Questionnaire	Anticipatory Guidance
6 months		X	X
9 months		X	X
12 months	X (risk assessment if not enrolled in Medicaid)		X
24 months	X (risk assessment if not enrolled in Medicaid)		X
36-72 months	X - If there's no record of previous test at 12 and 24 months	X - Complete annually unless blood lead test performed	X

Lead Risk Assessment Questionnaire

The GHHLPPP Childhood Lead Risk Questionnaire can be found at:

<http://dph.georgia.gov/lead-screening-guidelines-children> in [English](#), [Spanish](#) and [Vietnamese](#).

Rev. 04/14
Rev. 10/14

When using the questionnaire, blood lead tests should be done right away if the child is at high risk (one or more "yes" or "I don't know" answers on the lead risk assessment questionnaire) for lead exposure. Completing this questionnaire does not count as a lead screening.

Rev. 04/12

Blood Lead Test

A blood test is the preferred method for lead screening. There are two types of blood lead specimens used for testing: capillary blood test or venous blood test. Finger stick capillary blood tests (the Lead Care II Analyzer uses capillary blood) can be done as the initial screening. However, a lab analyzed sample is necessary for confirmation. Safety measures should be taken to reduce the risk of contamination of the capillary blood sample. These measures include:

Rev. 04/12
Rev. 07/15

- Rinsing powder from the examination gloves
- Thoroughly washing patient's hands with soap and water, then drying them before taking a sample.

A venous blood test can be done as the initial screening as well. This method should always be used to confirm elevated blood lead test results when a capillary test was used as the initial screening. Alternatively, a second lab analyzed capillary test can be used to confirm an initial capillary test when the test is conducted according to the schedule in Table 1 - Lead Screening Requirements and Medical Management Recommendations for Children ages 6 to 72 months.

Rev. 04/12
Rev. 07/15
Rev. 07/17

All venous sample lead screening tests conducted using any Magellan Diagnostic lead testing system should be laboratory analyzed by a properly accredited laboratory .

If a child's capillary Blood Lead Test comes back elevated ($\geq 10\text{ug/dL}$ reported by a certified lab or $\geq 6\text{ug/dL}$ using the Lead Care II analyzer), then a confirmatory test must be performed. The confirmatory diagnostic test should be lab analyzed and done according to the schedule in Table 1 - Lead Screening Requirements and Medical Management Recommendations for Children ages 6 to 72 months.

If the schedule in Table 1 is not followed and 6 months has gone by since the initial screening test, the next test is considered a new screening test. Decisions on follow-up testing should be made based on the results of the new screening test, not on the basis of the original screening test.

Reporting Guidelines

Providers who utilize the Lead Care II Analyzer to perform blood lead tests should report the Lead Care II Analyzer generated results to the GHHLPPP. On a weekly basis, providers should upload their test results to the [State Electronic Notifiable Disease Surveillance System \(SendSS\)](#). SENDSS is a web-based reporting system designed to collect information about notifiable diseases in Georgia. SendSS recommends providers keep track of their Lead Care II Analyzer test results by documenting those results in a Blood Lead Test Reporting Log. The log may be completed in Microsoft Excel, Microsoft Word or compatible software. If reports are not complete, GHHLPPP may contact providers' offices for missing information. Complete a new Blood Lead Reporting each week. Upload the Blood Lead Test Reporting Log and submit weekly to the GHHLPPP via SendSS. For uploading instructions, refer to the *SendSS Registration and Login Manual for Uploading Lead Report Files*.

SendSS - Disclaimer

Sendss Privacy Statement

This system will allow persons authorized by DHR to access protected health information about individuals for reporting and treatment purposes. This information is entitled to significant privacy protections under federal and state law. The Health Insurance Portability and Accountability Act of 1996 (HIPAA) permits a covered entity to use and disclose protected health information without written authorization if the use or disclosure is for treatment, payment, or health care operations. However, HIPAA requires covered entities to have in place appropriate administrative, technical, and physical safeguards to protect the privacy of protected health information. The disclosure of this information to unauthorized persons or for unauthorized purposes is prohibited without the written consent of the person who is the subject of the information, unless specifically permitted by federal or state law. Unauthorized disclosures of this information may result in significant criminal or civil penalties, as well as punishment up to and including the termination of employment. Failure to properly logout of SENDSS can result in an unauthorized disclosure. Any unauthorized disclosures will be investigated promptly and thoroughly prosecuted.

Agreeing with the Privacy Statement confirms your status as an authorized SENDSS user who is accessing the database only for reporting and treatment purposes. Agreeing with the Privacy Statement also confirms that as an authorized SENDSS user you will reasonably safeguard protected health information from any use or disclosure that is in violation of the Privacy Statement or state and federal law.

ENVIRONMENTAL LEAD RISK ASSESSMENTS

Rev. 01/13

Certified Lead Risk Assessors who conduct the initial environmental lead risk assessment should bill Medicaid using code T1028 and the appropriate diagnosis code. For follow up clearance inspections following removal of the lead hazards, the certified lead risk assessor should bill Medicaid using code T1028 with the U-1 modifier. For additional information, please consult the Diagnostic Screening and Preventive Services (DSPS) Manual.

	<u>Procedure Code</u>
Initial lead investigation	T1028
Post hazard abatement	T1028 - (Modifier U-1)

Georgia and other Lead Resources

Rev. 04/14

Lead Information for Professionals and Parents

For information on lead poisoning and prevention, professionals and parents can call GHHLPPP (Georgia Healthy Homes and Lead Poisoning Prevention Program) at 404-657-6534 or the National Lead Information Center at 1-800-424-lead (5323).

Georgia Public Health Laboratory (GPHL)

The Georgia Public Health Laboratory, which has locations in Decatur, Waycross and Albany, performs blood lead testing on children for the Georgia Healthy Homes and Lead Poisoning Prevention Program (GHHLPPP). Contact information:

GPHL
1749 Clairmont Road
Decatur, GA 30033
Phone 1-800-GEORGIA.

Emergency Information on Lead:

Call the Georgia Poison Center at 1-800-222-1222.

Sources of Lead

Common Sources of Lead

- Lead-based paint
- Lead dust, which is produced by aging lead-based paint
- Soil, which is contaminated by lead emissions from gasoline (prior to 1978), lead-based paint chips, storage of old batteries, etc.
- Water which flows through lead pipes or copper pipes soldered with lead (prior to 1986)
- Improperly glazed ceramic pottery and cooking utensils
- Construction workers, particularly those doing:
 - Department of Transportation (DOT) Sign Makers
 - Painting
 - Remodeling
 - Renovation
 - Road work (specifically painters)

Industries

- Battery manufacturers or reclamation
- Window replacement
- Bronze manufacture
- Firing range instructors
- Gas station attendants
- Glass manufacturers
- Lead pigment manufacture
- Lead smelters and refiners
- Plumbers, pipe fitters
- Policemen who work in automobile tunnels
- Printers
- Radiator manufacture or repair
- Shipbuilders
- Welders or Cutters – Steel burning or cutting (dismantling bridges, ships, etc)
- Bridge or ship workers (including airports and boats)

Hobbies, Sports, Other

- Moonshine whiskey
- Car or boat repair
- Fishing
- Glazed pottery making
- Home remodeling
- Lead soldering
- Making lead shot or bullet
- Shooting at firing range
- Stained glass manufacture
- Additives to some “health foods” and imported candies
- Substance Use
- Toy soldiers (leaded)
- Folk Remedies – Most commonly found in Mexican, Asian Indian, and Middle Eastern groups. Names include: *Alarcon*, *Alkohol*, *Azarcon*, *Bali Goli*, *Coral*, *Ghasard*, *Greta*, *Liga*, *Pay-loo-ah*, *Rueda*. Cosmetics, used commonly by those from the Middle East and India.

APPENDIX B

Guidelines in Screening and Reporting for TB Disease and Infection

Tuberculin Skin Testing

Mantoux tuberculin skin testing is the standard method of identifying persons infected with *M. tuberculosis*. Multiple puncture tests should NOT be used to determine whether a person is infected.

The Mantoux test is performed by giving an intradermal injection of 0.1 ml of purified protein derivative (PPD) tuberculin containing 5 tuberculin units (TU) into either the volar or dorsal surface of the forearm. The injection should be made with a disposable tuberculin syringe, just beneath the surface of the skin, with the needle bevel facing upward. This should produce a discrete, pale elevation of the skin (a wheal) 6 mm to 10 mm in diameter.

The reaction to the Mantoux test should be read by a trained health care worker 48 to 72 hours after the injection. If a patient fails to show up for the scheduled reading, a positive reaction may still be measurable up to 1 week after testing.

However, if a patient who fails to return within 72 hours has a negative reaction, tuberculin testing should be repeated.

The area of induration (palpable swelling) around the site of injection is the reaction to tuberculin. The diameter of the indurated area should be measured across the forearm (perpendicular to the long axis). Erythema (redness) should not be measured. All reactions should be recorded in millimeters of induration, even those classified as negative. If no induration is found, “0 mm” should be recorded.

Reporting requirements

In Georgia, all tuberculosis must be reported immediately to the local county health department. Physicians, hospitals, laboratories and other health care providers are required to report any of the following:

- Any child less than 5 years discovered with Latent TB Infection
- Any confirmed case of TB
- Any suspected case of TB
- Any person being treated with two (2) or more anti-tuberculosis drugs
- Any positive culture for *Mycobacterium tuberculosis*
- Any positive smear for AFB (Acid Fast Bacilli)

How to report

- Report cases electronically through the [State Electronic Notifiable Disease Surveillance System \(SENDSS\)](#)
- Complete a [Notifiable Disease Report Form](#) and mail in an envelope marked CONFIDENTIAL, or
- Call your [County Health Department](#)
- If your County Health Department cannot be reached, call the Georgia Department of Public Health, TB Section at 404-657-2634.

Rev. 10/14
Rev. 10/15

Childhood TB Risk Assessment Questionnaires

The AAP Bright Futures Guidelines for Health Supervision of Infants, Children, and Adolescents (3rd edition) recommends asking the following questions:

- 1) Was your child born in a country at high risk for tuberculosis?
- 2) Has your child traveled (had contact with resident populations) for longer than 1 week to a country a high risk for tuberculosis?
- 3) Has a family member or contact had tuberculosis or a positive tuberculin skin test?

Resource: <https://brightfutures.aap.org/materials-and-tools/Pages/default.aspx>

For more information about tuberculosis in Georgia: contact

Georgia Tuberculosis (TB) Section

2 Peachtree St. NW

12th Floor

Atlanta, GA 30303

(Phone) 404-657-2634

(Fax) 404-463-3460

The TB Program has the [legal responsibility](#) for all TB clients in Georgia regardless of who provides the direct services. TB services are available to all who fall within the service criteria without regard to the client's ability to pay.

APPENDIX C-1

Vaccine Administration Codes

Effective January 1, 2013, the vaccine administration reimbursement rates for administering immunizations under the EPSDT Program have been adjusted. The Medicaid maximum allowable reimbursement for vaccine administration is \$10.00 for Medicaid Fee for Service Providers and \$18.50 for PeachCare for Kids® Fee for Service Providers, as indicated in Table C-1a.

Effective July 1, 2016, physicians and physician extenders who are eligible for the HB 751 FY 2017 Primary Care Providers (PCP) rate increase will be reimbursed the following rates, as indicated below in Table C-1b, when the specified codes are billed for established Medicaid-eligible and PeachCare for Kids®-eligible members.

Table C-1a

Vaccine Administration Reimbursement Rates		
HIPAA Procedure Code	Medicaid Fee For Service (FFS) Reimbursement	PeachCare for Kids® (PCK) Fee For Service (FFS) Reimbursement
90460	\$10.00	\$18.50
90471	\$10.00	\$18.50
90472	\$10.00	\$18.50
90473	\$10.00	\$18.50
90474	\$10.00	\$18.50

Table C-1b

Primary Care Providers Rate Increase HB 751 FY 2017		
HB 751 FY2017 Increased Reimbursement Rates		
Vaccine Administration		
HIPAA Procedure Code	Medicaid Fee For Service (FFS) Reimbursement	PeachCare for Kids® (PCK) Fee For Service (FFS) Reimbursement
90460	\$21.93	\$21.93
90471	\$23.54	\$23.54
90472	\$11.98	\$18.50

Table C-1c

Vaccine Administration Codes		
HIPAA Procedure Code	HIPAA Modifier	Procedure Code Description
90460	EP	Pediatric Immunization Administration Code. Immunization administration through 18 years of age via any route of administration, with counseling by physician or other qualified health care professional.
90471	EP	Non-Age Specific Immunization Administration Code. Immunization administration (includes percutaneous, intradermal, subcutaneous, or intramuscular injections); one vaccine (single or combination vaccine/toxoid)
90472	EP	Non-Age Specific Immunization Administration Code. Immunization administration (includes percutaneous, intradermal, subcutaneous, or intramuscular injections); each additional vaccine (single or combination vaccine/ toxoid)
90473	EP	Non-Age Specific Immunization Administration Code. Immunization administration (includes intranasal or oral administration); one vaccine (single or combination vaccine/toxoid)
90474	EP	Non-Age Specific Immunization Administration Code. Immunization administration (includes intranasal or oral administration); each additional vaccine (single or combination vaccine/toxoid)

Vaccine Administration Code for Face-to-Face Counseling

90460 - Vaccine administration through 18 years of age via any route of administration, with counseling by physician or other qualified health care professional.

90460 is reported when both of the following requirements are met: (1) The patient must be 18 years of age or younger. (2) The physician or other qualified health care professional must perform face-to-face vaccine counseling associated with the administration. *(Any clinical staff can do the actual administration of the vaccine per the physician's or the qualified health care professional's orders.)*

If both of these requirements are not met, report a non-age specific vaccine administration code(s) (90471-90474) instead.

90460 may be reported for more than one (1) unit of vaccine administered during a single office visit.

Note: Local Public Health Departments May use vaccine administration code 90460 only if a physician or other qualified health care professional performs face-to-face vaccine counseling associated with administration of the vaccine.

A 'qualified health care professional' is an individual who by education, training, licensure/ regulation, facility credentialing (when applicable), and payer policy is able to perform a professional service within their scope of practice and independently report a professional service. These professionals are distinct from 'clinical staff.' A clinical staff member is a person who works under

Rev. 04/13
Rev. 07/13
Rev. 07/14
Rev. 10/14

the supervision of a physician or other qualified health care professional and who is allowed by law, regulation, facility, and payer policy to perform or assist in the performance of specified professional services, but who does not individually report any professional services. (CPT 2012)

Non-Age Specific Vaccine Administration Codes

These codes must be used when there is no face-to-face physician counseling associated with vaccine administration. The add-on codes (90472, 90474) may also be used in conjunction with the 90460 code.

Codes 90471 and 90473 are used to code for the first vaccine given during a single office visit. Codes 90472 and 90474 are considered add-on codes (*hence the + symbol next to them*) to 90471 and 90473, respectively. This means that the provider will use 90472 and 90474 in addition to 90471 or 90473 if more than one vaccine is administered during a visit. Providers may use 90460 for the first (ie, counseled) vaccine and 90472 or 90474 for the second (ie, non-counseled) vaccine. Note that there can only be one first administration during a given visit.

90471 - Vaccine administration (includes percutaneous, intradermal, subcutaneous, or intramuscular injections); one vaccine (single or combination vaccine/toxoid)

Do not report 90471 in conjunction with 90473 or 90460

+90472 - Vaccine administration (includes percutaneous, intradermal, subcutaneous, or intramuscular injections); each additional vaccine (single or combination vaccine/toxoid) (List separately in addition to code for primary procedure.)

May use 90472 in conjunction with 90471 or 90473 or 90460

90473 - Vaccine administration (includes intranasal or oral administration); one vaccine (single or combination vaccine/toxoid)

Do not report 90473 in conjunction with 90471 or 90460

+90474 - Vaccine administration (includes intranasal or oral administration); each additional vaccine (single or combination vaccine/toxoid) (List separately in addition to code for primary procedure.)

May use 90474 in conjunction with 90471 or 90473 or 90460

Vaccine Administration Codes for 19 – 20 year olds

EPSDT providers may bill the EPSDT benefit for vaccines administered to members nineteen (19) years of age through twenty (20) years of age. Providers must include the vaccine's CPT, NDC, and diagnosis code, along with the appropriate vaccine administration code(s) [90471, 90472, 90473, 90474] on the EPSDT claim. The Division will reimburse for the vaccine product (providers must use their own stock of vaccines) and for vaccine administration.

Billing Tips

Rev. 04/13
Rev. 07/13

- Code the vaccine administration with the appropriate vaccine administration code and the EP modifier.
- For the vaccine, code the vaccine product code, the associated diagnosis code and the EP modifier.
- The primary vaccine administration code (90460, 90471, or 90473) must precede the add-on vaccine administration code(s) (90472 or 90474), if applicable.
- The vaccine product code must immediately follow the corresponding vaccine administration code.

Rev. 07/15

- Code the vaccine administration code(s), the vaccine product code(s), and the preventive or interperiodic visit on the same claim when vaccines are administered during a preventive or interperiodic visit. Each vaccine administration code should be listed only once per claim. If multiple vaccine product codes correspond to the same vaccine administration code, the vaccine administration code is listed once with the appropriate number of units indicated.
- 90460 may be reported for more than one (1) unit of vaccine administered during a single office visit.

Rev. 07/14
Rev. 10/15

- May report diagnosis code Z00.121 or Z00.129 with each of the vaccine administration codes ONLY when vaccines are administered during EPSDT preventive health visits for members through age 17 years.
- May report diagnosis code Z00.00 or Z00.01 with each of the vaccine administration codes ONLY when vaccines are administered during EPSDT preventive health visits for members age 18 years through 20 years.

Rev. 04/14
Rev. 07/14
Rev. 10/14
Rev. 04/15

- Use the appropriate vaccine diagnosis code (see Appendix C-2 for specific diagnosis codes) with the vaccine administration code when the vaccine is administered outside of the EPSDT preventive health visit.
- Code the EPSDT preventive visit (9938x or 9939x) with the EP and the 25 modifiers when vaccines are administered during the preventive health visit.
- Code the EPSDT interperiodic visits (99201-99203 or 99212-99214) with the EP and the 25 modifiers when vaccines are administered during the interperiodic health visit.

Rev. 04/14

- The National Correct Coding Initiative (NCCI) does not allow reimbursement of the 99211 code when it is billed together with any of the vaccine administration codes regardless of whether the 25 modifier is appended to the 99211 code.

APPENDIX C-2

Vaccine Procedure and Diagnosis Codes (Ages Birth through 18 years)

The following vaccine procedure and diagnosis codes must be included on the claim, following the vaccine administration code, when billing for vaccine administration.

HIPAA Procedure Code	HIPAA Modifier	Procedure Code Description
90620	EP	Meningococcal recombinant protein and outer membrane vesicle vaccine, serogroup B (MenB), 2 dose schedule, for intramuscular use (10-18 years) [Bexsero]
90621		Meningococcal recombinant lipoprotein vaccine, serogroup B (MenB), 3 dose schedule, for intramuscular use (10-18 years) [Trumenba]
90633	EP	Hepatitis A vaccine (HepA), pediatric/adolescent dosage-2 dose schedule, for intramuscular use
90636	EP	Combination Hepatitis A/Hepatitis B vaccine, adult dosage, 3 dose, for intramuscular use (18 years)
90644	EP	Meningococcal conjugate vaccine, serogroups C & Y and Haemophilus influenza type b vaccine (Hib-MenCY), 4 dose schedule, for intramuscular use (2-18 months)
90647	EP	Haemophilus influenzae type b vaccine (Hib), PRP-OMP conjugate, 3 dose schedule, for intramuscular use
90648		Haemophilus influenzae type b vaccine (Hib), PRP-T conjugate, 4 dose schedule, for intramuscular use
90649	EP	Human Papillomavirus HP vaccine, types 6, 11, 16, 18 quadrivalent (4vV), 3 dose schedule, for intramuscular use (ages 9 years and older)
90650		Human Papillomavirus HP vaccine, types 16, 18, bivalent (2vV), 3 dose schedule, for intramuscular use (females, ages 10 years and older)
90651		Human Papillomavirus (HP) vaccine types 6, 11, 16, 18, 31, 33, 45, 52, 58 nonavalent (9vV), 3-dose schedule, for intramuscular use (females and males 9 years and older) [Gardasil 9]
90655	EP	Influenza virus vaccine, trivalent (IIV3), split virus, preservative free, 0.25 mL dosage, for intramuscular use
90656		Influenza virus vaccine, trivalent (IIV3), split virus, preservative free, 0.5 mL dosage, for intramuscular use
90657		Influenza virus vaccine, trivalent (IIV3), split virus, 0.25 mL dosage, for intramuscular use
90658		Influenza virus vaccine, trivalent (IIV3), split virus, 0.5 mL dosage, for intramuscular use

HIPAA Procedure Code	HIPAA Modifier	Procedure Code Description
90672**		Influenza virus vaccine (FluMist), quadrivalent, live (LAIV4), for intranasal use (2 years and older) – [see ACIP statement at bottom of page]
90685	EP	Influenza virus vaccine, quadrivalent (IIV4), split virus, preservative free, 0.25 mL dosage, for intramuscular use
90686		Influenza virus vaccine, quadrivalent (IIV4), split virus, preservative free, 0.5 mL dosage, for intramuscular use
90687		Influenza virus vaccine, quadrivalent (IIV4), split virus, 0.25 mL dosage, for intramuscular use
90688*		Influenza virus vaccine, quadrivalent (IIV4), split virus, 0.5 mL dosage, for intramuscular use
90670	EP	Pneumococcal conjugate vaccine, 13 valent (PCV13), for intramuscular use
90680	EP	Rotavirus vaccine, pentavalent (RV5), 3 dose schedule, live, for oral use (RotaTeq)
90681	EP	Rotavirus vaccine, human, attenuated (RV1), 2 dose schedule, live, for oral use (Rotarix)
90696	EP	Diphtheria, tetanus toxoids, and acellular pertussis vaccine and inactivated poliovirus vaccine, (DTaP-IPV), for intramuscular use (ages 4-6 years)
90698	EP	Diphtheria, tetanus toxoids, acellular pertussis vaccine, Haemophilus influenzae type B, and inactivated poliovirus vaccine (DTaP-IPV/Hib), for intramuscular use
90700	EP	Diphtheria, tetanus toxoids, and acellular pertussis vaccine (DTaP), for intramuscular use (ages younger than 7 years)
90707	EP	Measles, mumps, and rubella virus vaccine (MMR), live, for subcutaneous use
90710	EP	Measles, mumps, rubella, and varicella vaccine (MMRV), live, for subcutaneous use
90713	EP	Poliovirus vaccine (IPV), inactivated, for subcutaneous or intramuscular use
90714	EP	Tetanus and diphtheria toxoids adsorbed (Td), preservative free, for intramuscular use (7 years to 18 years, 11 months)
90715	EP	Tetanus, diphtheria toxoids and acellular pertussis vaccine (Tdap), for intramuscular use (7 years to 18 years, 11 months)
90716	EP	Varicella virus vaccine (VAR), live, for subcutaneous use
90723	EP	Diphtheria, tetanus toxoids, acellular pertussis vaccine, Hepatitis B and poliovirus vaccine (DTaP-Hep B-IPV), for intramuscular use
90732	EP	Pneumococcal polysaccharide vaccine, 23-valent (PPSV23), adult or immunosuppressed patient dosage, when administered to 2 years or older, for subcutaneous or intramuscular use
90734	EP	Meningococcal conjugate vaccine, serogroups A, C, Y and W-135 quadrivalent (MenACWY), for intramuscular use
90744	EP	Hepatitis B vaccine (HepB), pediatric/adolescent dosage, 3 dose schedule, for intramuscular use
90747		Hepatitis B vaccine (HepB), dialysis or immunosuppressed patient dosage, 4 dose schedule, for intramuscular use

** - On June 22, 2016, CDC's Advisory Committee on Immunization Practices (ACIP) voted that live attenuated influenza vaccine (LAIV), also known as the "nasal spray" flu vaccine, should not be used during the 2016-2017 flu season. ACIP continues to recommend annual flu vaccination, with either the inactivated influenza vaccine (IIV) or recombinant influenza vaccine (RIV), for everyone 6 months and older.

Vaccine Procedure and Diagnosis Codes **(Ages 19 through 20 years)**

The Division will reimburse for the vaccine product (providers must use their own stock of vaccines) and for vaccine administration for vaccines administered to Medicaid-eligible members nineteen (19) years of age through twenty (20) years of age. Providers who administer any one of the vaccines listed below will receive reimbursement for administering each vaccine PLUS reimbursement for the vaccine product. The reimbursement rates for the vaccine products may be found in the Physicians' Injectable Drug List Manual. Providers must include the vaccine's procedure and diagnosis codes on the claim.

<i>Vaccine Procedure and Diagnosis Codes</i> (Ages 19 through 20 years)		
HIPAA Procedure Code	HIPAA Modifier	Procedure Code Description
90620	EP	Meningococcal recombinant protein and outer member vesicle vaccine, serogroup B (MenB), 2 dose schedule, for intramuscular use (Bexsero)
90621		Meningococcal recombinant lipoprotein vaccine, serogroup B (MenB), 3 dose schedule, for intramuscular use (Trumenba)
90632	EP	Hepatitis A vaccine (HepA), adult dosage, for intramuscular use
90636		Combination Hepatitis A/Hepatitis B vaccine, adult dosage, 3 dose, for intramuscular use
90746	EP	Hepatitis B vaccine (HepB), adult dosage 3 dose schedule, for intramuscular use
90747		Hepatitis B vaccine (HepB), dialysis or immunosuppressed patient dosage 4 dose, for intramuscular use
90649	EP	Human Papillomavirus HP vaccine, types 6, 11, 16, 18 quadrivalent (4vV), 3 dose schedule, for intramuscular use
90650		Human Papillomavirus HP vaccine, types 16, 18 bivalent (2vV), 3 dose schedule, for intramuscular use (females)
90651		Human Papillomavirus HP vaccine types 6, 11, 16, 18, 31, 33, 45, 52, 58, nonavalent (9vV), 3-dose schedule, for intramuscular use (females & males) [Gardasil 9]
90630	EP	Influenza virus vaccine, quadrivalent (IIV4), no preservative, for intradermal use
90656		Influenza virus vaccine, trivalent (IIV3), split virus, preservative free, for intramuscular use
90658		Influenza virus vaccine, trivalent (IIV3), split virus, for intramuscular use
90672**		Influenza virus vaccine, quadrivalent, live (LAIV4), for intranasal use

APPENDIX C-3

Tuberculin (TB) Skin Test Procedure Codes

Rev. 03/13
Rev. 04/13
Rev. 04/14
Rev. 07/14
Rev. 04/15
Rev. 10/15

The maximum reimbursement rate for the TB skin test provided by private providers is \$8.13 and \$3.00 for public health providers.

Use the following procedure and diagnosis codes to document the Tuberculin Skin Test.

HIPAA Procedure Code	ICD-10 Diagnosis Code	HIPAA Modifier	Procedure Code Description	Fee For Service Reimbursement
86580	Z11.1	EP	TB Skin Test	\$3.00 (public) \$8.13 (private)

APPENDIX C-4

Blood Lead Level Testing Procedure Codes

Blood Lead Level (BLL):

Use the procedure and diagnosis codes below for documenting on the claim that the Blood Lead Level (BLL) specimen was drawn and either sent to a private laboratory for analysis or the analysis was performed using an in-office blood lead level analyzer:

HIPAA Procedure Code	HIPAA Modifier	Procedure Code Description	ICD-10 Diagnosis Code	Fee For Service Reimbursement
36415	EP	Blood Lead Level Venous	Z13.88	\$0.00
36416	EP	Blood Lead Level Capillary	Z13.88	\$0.00

Rev. 07/11
Rev. 07/12
Rev. 03/13
Rev. 04/14
Rev. 07/14
Rev. 04/15
Rev. 10/15
Rev. 01/16

Providers who send Blood Lead Level specimen to the Georgia Public Health Laboratory (GPHL) will be billed \$10.00 by the GPHL. Therefore, FFS providers should bill HIPAA Procedure Code 83655 with modifiers EP, 90 or EP, 91 and diagnosis code Z13.88 on the same claim with the appropriate CPT codes (36415 or 36416) as seen above. This billing will result in a Fee For Service Reimbursement of \$10.00 and is only available when documentation supports that the BLL was sent to the GPHL.

Diagnosis Code/ Modifier	Description
Z13.88	Chemical poisoning and other contamination screening for: heavy metal poisoning, ingestion of radioactive substance, poisoning from contaminated water supply, radiation exposure.
Modifier 90	Reference (Outside) Laboratory: When laboratory procedures are performed by a party other than the treating or reporting practitioner, the procedure may be identified by adding modifier 90 to the usual procedure number.
Modifier 91	Repeat Clinical Diagnostic Laboratory Test: In the course of treatment of the patient, it may be necessary to repeat the same laboratory test on the same day to obtain subsequent (multiple) test results.

APPENDIX D

Children's Intervention Services

The Children's Intervention Services (CIS) program offers coverage for restorative and/or rehabilitative services to eligible members in non-institutional settings. Services must be determined medically necessary and be recommended and documented as appropriate interventions by a physician or other licensed practitioner of the healing arts, within their scope of practice under state law, for the maximum reduction of physical disability or developmental delay and restoration of the member to the best possible functional level.

The CIS program is comprised of seven intervention services that must be provided by licensed practitioners of the healing arts. The seven services are:

- Audiology
- Nursing
- Nutrition provided by licensed dietitians
- Occupational Therapy
- Physical Therapy
- Counseling provided by licensed clinical Social Workers
- Speech-language Pathology

Qualified providers must be currently licensed as audiologists, registered nurses, dietitians, occupational therapists, physical therapists, clinical social workers, or speech-language pathologists.

APPENDIX E

Medicaid Non-Emergency Transportation

People enrolled in the Medicaid program need to get to and from health care services, but many do not have any means of transportation. The Non-Emergency Transportation Program (NET) provides a way for Medicaid recipients to get that transportation so they can receive necessary medical services covered by Medicaid.

How do I get non-emergency transportation services?

If you are a Medicaid recipient and have no other way to get to medical care or services covered by Medicaid, you can contact a transportation broker to take you. In most cases, you must call three days in advance to schedule transportation. Urgent care situations and a few other exceptions can be arranged more quickly. Each broker has a toll-free telephone number to schedule transportation services, and is available weekdays (Monday-Friday) from 7 a.m. to 6 p.m. All counties in Georgia are grouped into five regions for NET services. A NET Broker covers each region. If you need NET services, you must contact the NET Broker serving the county you live in to ask for non-emergency transportation. See the chart below to determine which broker serves your county, and call the broker's telephone number for that region.

What if I have problems with a NET broker?

The Division of Medical Assistance (DMA) monitors the quality of the services brokers provide, handling consumer complaints and requiring periodic reports from the brokers. The state Department of Audits also performs on-site evaluations of the services provided by each broker. If you have a question, comment or complaint about a broker, call the Member CIC at 866-211-0950.

APPENDIX F

Childhood Obesity – Weight Assessment and Counseling for Nutrition and Physical Activity for Children/Adolescents

Rev. 10/13
Rev. 07/14
Rev. 07/16

Body Mass Index (BMI)

What is BMI?

Body Mass Index (BMI) is used as a screening tool to identify possible weight problems for children and adolescents. The Centers for Disease Control and Prevention (CDC) and the American Academy of Pediatrics (AAP) recommend the use of BMI to screen for overweight and obesity in children and adolescents aged 2 through 19 years.

BMI is a number calculated from a child's weight and height. BMI does not measure body fat directly, but it is a reliable indicator of body fatness for most children and adolescents.

For children and adolescents, BMI is age- and sex-specific and is often referred to as BMI-for-age. A child's weight status is determined using an age- and sex-specific percentile for BMI rather than the BMI categories used for adults because children's body composition varies as they age and varies between boys and girls.

What is a BMI percentile?

After the BMI is calculated for children and adolescents, the BMI number is plotted on the BMI-for-age growth charts (for either girls or boys) to obtain a percentile ranking. Percentiles are the most commonly used indicator to assess the size and growth patterns of individual children in the United States. The percentile indicates the relative position of the child's BMI number among children of the same sex and age. The CDC's [growth charts](#) show the weight status categories used with children and adolescents.

WEIGHT STATUS CATEGORY	PERCENTILE RANGE
Underweight	Less than the 5 th percentile
Healthy Weight	5 th percentile to less than the 85 th percentile
Overweight	85 th to less than the 95 th percentile
Obese	Equal to or greater than the 95 th percentile

How to calculate BMI using a handheld calculator?

Rev. 10/13

The BMI can be calculated using either English or metric units.

Formula: $\text{weight (kg)} / [\text{height (m)}]^2$

With the metric system, the formula for BMI is weight in kilograms divided by height in meters squared. Since height is commonly measured in centimeters, an alternate calculation formula, dividing the weight in kilograms by the height in centimeters squared, and then multiplying the result by 10,000, can be used.

Formula: $\text{weight (lb)} / [\text{height (in)}]^2 \times 703$

Rev. 07/14

When using English measurements, ounces (oz) and fractions must be changed to decimal values. Then, calculate BMI by dividing weight in pounds (lbs) by height in inches (in) squared and multiplying by a conversion factor of 703. Plot the calculated BMI to obtain the BMI percentile.

How to interpret BMI?

Calculating the BMI-for-age for children of different ages and sexes may yield the same numeric result, but the result may fall at a different percentile for each child for one or both of the following reasons:

- The normal BMI-related changes that take place as children age and as growth occurs (ex. The amount of body fat changes with age).
- The normal BMI-related differences between sexes (ex. The amount of body fat differs between girls and boys).

Documentation for BMI

Documentation in the medical record for BMI must include the following:

- Height
- Weight
- BMI percentile plotted on the age-growth chart

Rev. 04/14
Rev. 07/14
Rev. 04/15
Rev. 10/15
Rev. 01/16

ICD-10 Codes to Identify BMI Percentile

Body Mass Index, pediatric

Z68.51 BMI < 5th percentile for age (Underweight)

Z68.52 BMI 5th to < 85th percentile for age (Normal / Healthy Weight Range)

Z68.53 BMI 85th to < 95th percentile for age (Overweight)

Z68.54 BMI ≥ 95th percentile for age (Obese)

Note: BMI pediatric codes are for use for persons 2-20 years old. These percentiles are based on the CDC's [growth charts](http://www.cdc.gov/growthcharts/) which are available at <http://www.cdc.gov/growthcharts/>.

FFS EPSDT providers are encouraged to report BMI percentile diagnosis codes with the EPSDT preventive health codes. Do not point the preventive health visit code to the BMI percentile diagnosis code because this will cause the FFS claim to deny payment.

Counseling for Nutrition

Guidelines

The *Dietary Guidelines for Americans* (<http://health.gov/dietaryguidelines/2015/guidelines/>) comprise core principles to help people, ages 2 years and older, develop healthy lifestyles based on individual needs, likes, and dislikes related to both eating and physical activity. The Dietary Guidelines recommend that children and adolescents consume a healthy eating pattern that accounts for all foods and beverages within an appropriate calorie level. A healthy eating pattern includes a variety of vegetables from all of the subgroups, fruits, grains, fat-free or low-fat dairy, a variety of protein foods and oils. A healthy eating pattern limits saturated fats and *trans* fats, added sugars, and sodium.

Documentation for HEDIS compliance

Documentation (in the medical record) of counseling for nutrition must include a statement indicating the date and at least one of the following:

- Discussion of current nutrition behaviors (e.g., eating habits, dieting behaviors).
- Checklist indicating nutrition was addressed.
- Counseling or referral for nutrition education.
- Member received educational materials on nutrition during a face-to-face visit.
- Anticipatory guidance for nutrition.
- Weight or obesity counseling.

ICD-10 Code to Identify Counseling for Nutrition

- Z71.3 – nutritional counseling

FFS EPSDT providers are encouraged to report the nutrition diagnosis code with the EPSDT preventive health codes. Do not point the preventive health visit code to the nutrition and physical activity counseling diagnosis code because this will cause the FFS claim to deny payment.

Counseling for Physical Activity

Guidelines

The *Physical Activity Guidelines for Americans* (<http://health.gov/paguidelines/guidelines/children.aspx>) describe the types and amounts of physical activity that offer substantial health benefits for children and adolescents (ages 6 to 17) and adults. The *Physical Activity Guidelines for Americans* complement the *Dietary Guidelines for Americans*, and together the documents provide guidance on the importance of being physically active and eating healthy foods to promote health and reduce the risk of chronic diseases. The Physical Activity Guidelines recommend that children and adolescents have 60 minutes (1 hour) or more of physical activity each day. Physical activity includes aerobic/endurance activities (to increase cardiorespiratory fitness), muscle-strengthening (resistance training which builds strong muscles), and bone-strengthening (weight-bearing or weight-loading activities which promote bone growth and strength).

Documentation

Documentation (in the medical record) of counseling for physical activity must include a statement indicating the date and at least one of the following:

- Discussion of current physical activity behaviors (e.g., exercise routine, participation in sports activities, exam for sports participation).
- Checklist indicating physical activity was addressed.
- Counseling or referral for physical activity.
- Member received educational materials on physical activity during a face-to-face visit.
- Anticipatory guidance specific to the child's physical activity.
- Weight or obesity counseling.

Rev. 10/16

The following notations or examples of documentation are not compliant with HEDIS requirements:

- **BMI**
 - No BMI percentile documented in medical record or plotted on age-growth chart.
 - Notation of BMI value only.
 - Notation of height and weight only.
- **Nutrition**
 - No counseling/education on nutrition and diet.
 - Counseling/education before or after the HEDIS measurement year
 - Notation of “health education” or “anticipatory guidance” without specific mention of nutrition.
 - A physical exam finding or observation alone (e.g., well-nourished) is not compliant because it does not indicate counseling for nutrition.
- **Physical Activity**
 - No counseling/education on physical activity.
 - Notation of “cleared for gym class” along without documentation of a discussion.
 - Counseling/education before or after the measurement year.
 - Notation of “health education” or “anticipatory guidance” without specific mention of physical activity.
 - Notation of anticipatory guidance related solely to safety (e.g., wears helmet or water safety) without specific mention of physical activity recommendations.
 - Notation solely related to screen time (computer or television) without specific mention of physical activity.

Services may be rendered during a visit other than a well-child visit. These services count if the specified documentation is present, regardless of the primary intent of the visit. **Services specific to an acute or chronic condition do not count toward the “Counseling for Nutrition” and “Counseling for Physical Activity” measures.**

APPENDIX G

EPSDT Program Required Equipment Form

- ☐ Scale for Weighing Infants **present**
- ☐ Scale for Weighing Children and Adolescents **present**
- ☐ Measuring Board or Device for measuring Length or Height in the recumbent position for Infants and Children up to the age of two (2) **present**
- ☐ Measuring Board or Device for measuring Height in the vertical position for children who are over two (2) years old **present**
- ☐ Blood Pressure apparatus with infant, child, and adult cuffs **present**
- ☐ Screening audiometer **present**
- ☐ Centrifuge or other device for measuring hematocrit or hemoglobin may be **present**
- ☐ Eye charts appropriate for age of the child **present**
- ☐ Developmental/Behavioral, Alcohol/Substance Abuse and Depression screening tools and supplies **present** (*The required developmental screenings at ages 9 months, 18 months, and 30 months **must** be accomplished using one or more of the recommended standardized developmental screening tools specified in Section 902.2)*)
- ☐ Vaccines and immunization administration supplies **present**
- ☐ Lab supplies for appropriate lab tests/screenings **present**
- ☐ Ophthalmoscope and Otoscope **present**

The information supplied in this document is true, accurate and complete and is hereby released to the Georgia Department of Community Health, Division of Medicaid, for purpose of enrolling in the EPSDT Program. I understand that falsification, omission or misrepresentation of any information in this enrollment document will result in a denial of enrollment, the closure of current enrollment, and the denial of future enrollment request, and may be punishable by criminal, civil or other administrative actions. I understand that my completion of this form certifies that I have the necessary equipment as listed in Part II- Policies and Procedures Manual for the EPSDT Program.

APPENDIX H

Georgia Families

Rev. 01/11
Rev. 10/12
Rev. 04/14
Rev. 07/17

Georgia Families® (GF) is a statewide program designed to deliver health care services to members of Medicaid, PeachCare for Kids®, and Planning for Healthy Babies® (P4HB) recipients. The program is a partnership between the Department of Community Health (DCH) and private care management organizations (CMOs). By providing a choice of health plans, Georgia Families allows members to select a health care plan that fits their needs.

It is important to note that GF is a full-risk program; this means that the four CMOs licensed in Georgia to participate in GF are responsible and accept full financial risk for providing and authorizing covered services. This also means a greater focus on case and disease management with an emphasis on preventative care to improve individual health outcomes.

The four licensed CMOs:

 Amerigroup Community Care 800-249-0442 www.myamerigroup.com	 CareSource CareSource 888-901-0014 www.caresource.com
 Peach State Health Plan 866-874-0633 www.pshpgeorgia.com	 WellCare of Georgia, Inc. WellCare of Georgia 866-231-1821 www.wellcare.com

Children, parent/caretaker with children, pregnant women and women with breast or cervical cancer on Medicaid, as well as children enrolled in PeachCare for Kids® are eligible to participate in Georgia Families. Additionally, Planning for Healthy Babies® (P4HB) recipients receive services through Georgia Families® (GF). Children in foster care are enrolled in Georgia Families 360°.

Eligibility Categories for Georgia Families:

Included Populations	Excluded Populations
PeachCare for Kids®	Aged, Blind and Disabled
Parent/Caretaker with Children	Nursing home
Children under 19	Long-term care (Waivers, SOURCE)
Women's Health Medicaid (WHM)	Federally Recognized Indian Tribe
Transitional Medicaid	Georgia Pediatric Program (GAPP)
Refugees	Hospice
Planning for Healthy Babies	Children's Medical Services program
Resource Mothers Outreach	Medicare Eligible
Newborns	Supplemental Security Income (SSI) Medicaid
	Medically Needy

Georgia Families

Medicaid and PeachCare for Kids® members will continue to be eligible for the same services they receive through traditional Medicaid as well as new services. Members will not have to pay more than they paid for Medicaid co-payments or PeachCare for Kids® premiums. With a focus on health and wellness, the CMOs will provide members with health education and prevention programs as well as expanded access to plans and providers, giving them the tools needed to live healthier lives. Providers participating in Georgia Families will have the added assistance of the CMOs to educate members about accessing care, referrals to specialists, member benefits, and health and wellness education.

All four CMOs are State-wide.

The Department of Community Health has contracted with four CMOs to provide these services: Amerigroup Community Care, CareSource, Peach State Health Plan and WellCare. Members can contact Georgia Families for assistance to determine which program best fits their family's needs. If members do not select a plan, Georgia Families will select a health plan for them.

Members can visit the Georgia Families Web site at **www.georgia-families.com** or call **1-800-GA-ENROLL** (1-888-423-6765) to speak to a representative who can give them information about the CMOs and the health care providers.

The following categories of eligibility are included and excluded under Georgia Families:

Included Categories of Eligibility (COE):

COE	DESCRIPTION
104	LIM – Adult
105	LIM – Child
118	LIM – 1st Yr Trans Med Ast Adult
119	LIM – 1st Yr Trans Med Ast Child
122	CS Adult 4 Month Extended

123	CS Child 4 Month Extended
135	Newborn Child
170	RSM Pregnant Women
171	RSM Child
180	P4HB Inter Pregnancy Care
181	P4HB Family Planning Only
182	P4HB ROMC - LIM
183	P4HB ROMC - ABD
194	RSM Expansion Pregnant Women
195	RSM Expansion Child < 1 Yr
196	RSM Expn Child w/DOB < = 10/1/83
197	RSM Preg Women Income < 185 FPL
245	Women's Health Medicaid
471	RSM Child
506	Refugee (DMP) – Adult
507	Refugee (DMP) – Child
508	Post Ref Extended Med – Adult
509	Post Ref Extended Med – Child
510	Refugee MAO – Adult
511	Refugee MAO – Child
571	Refugee RSM - Child
595	Refugee RSM Exp. Child < 1
596	Refugee RSM Exp Child DOB <= 10/01/83
790	Peachcare < 150% FPL
791	Peachcare 150 – 200% FPL

792	Peachcare 201 – 235% FPL
793	Peachcare > 235% FPL
835	Newborn
836	Newborn (DFACS)
871	RSM (DHACS)

895	RSM Exp Child < 1 (DHACS)
897	RSM Pregnant Women Income > 185% FPL (DHACS)
898	RSM Child < 1 Mother has Aid = 897 (DHACS)
918	LIM Adult
919	LIM Child
920	Refugee Adult
921	Refugee Child

APPENDIX I

Information for Providers Serving Medicaid Members in the Georgia Families 360SM Program

Rev. 04/14

Georgia Families 360SM, the state's new managed care program for children, youth, and young adults in Foster Care, children and youth receiving Adoption Assistance, as well as select youth in the juvenile justice system, launched Monday, March 3, 2014. Amerigroup Community Care is the single Care Management Organization (CMO) that will be managing this population.

DCH, Amerigroup, and partner agencies -- the Department of Human Services (DHS) and DHS' Division of Family and Children Services (DFCS), the Department of Juvenile Justice (DJJ) and the Department of Behavioral Health and Developmental Disabilities (DBHDD), as well as the Children's and Families Task Force continue their collaborative efforts to successfully rollout this new program.

Amerigroup is responsible through its provider network for coordinating all DFCS, DJJ required assessments and medically necessary services for children, youth and young adults who are eligible to participate in the Georgia Families 360SM Program. Amerigroup will coordinate all medical/dental/trauma assessments for youth upon entry into foster care or juvenile justice (and as required periodically).

Georgia Families 360SM members will also have a medical and dental home to promote consistency and continuity of care. Providers, foster parents, adoptive parents and other caregivers will be involved in the ongoing health care plans to ensure that the physical and behavioral health needs of these populations are met.

Electronic Health Records (EHRs) are being used to enhance effective delivery of care. The EHRs can be accessed by Amerigroup, physicians in the Amerigroup provider network, and DCH sister agencies, including the DFCS, regardless of where the child lives, even if the child experiences multiple placements.

Ombudsman and advocacy staff are in place at both DCH and Amerigroup to support caregivers and members, assisting them in navigating the health care system. Additionally, medication management will focus on appropriate monitoring of the use of psychotropic medications, to include ADD/ADHD medications.

Providers can obtain additional information by contacting the Provider Service Line at 1-800-454-3730 or by contacting their Provider Relations representative.

To learn more about DCH and its dedication to A Healthy Georgia, visit www.dch.georgia.gov

APPENDIX J

Preventive Oral Health: Fluoride Varnish

Rev. 07/10
Rev. 07/11
Rev. 04/15
Rev. 10/15
Rev. 01/16
Rev. 04/16
Rev. 10/16

Fluoride varnish acts to retard, arrest, and reverse the caries process. The teeth absorb the fluoride varnish, strengthening the enamel and helping prevent cavities. It is not a substitute for fluoridated water or toothpaste.

Once teeth are present, the application of fluoride varnish is required and may be applied every 3-6 months in the primary care or dental office for children between the ages of 6 months and 5 years.

<http://www.uspreventiveservicestaskforce.org/uspstf/uspsdnch.htm>

Indications for fluoride use are noted in the 2014 AAP clinical report “Fluoride Use in Caries Prevention in the Primary Care Setting”

<http://pediatrics.aappublications.org/cgi/doi/10.1542/peds.2014-1699>

Documentation: Evidence that fluoride varnish was applied once between the ages of 6 months and 5 years OR evidence that the provider addressed the fluoride varnish requirement and/or its importance with the parent.

D1206 - Current Dental Terminology (CDT) Code

99188 - Current Procedural Terminology (CPT) Code

Effective January 1, 2015, the application of topical fluoride varnish by a physician or other qualified health care professional may be billed with the new CPT code 99188. This applies to providers enrolled in and filing claims under GA Medicaid programs 430, 431, and 740. Only providers enrolled in and filing claims under GA Medicaid programs 430, 431, 450, and 740 may bill Code D1206 Fluoride Varnish (eff. 1/1/2010).

Note:

- Dentists: under category of service 450
- Physicians: under category of service 430
- Physician Assistants (PA): under category of service 431
- Nurse Practitioners: under category of service 740

Providers may not bill for an Evaluation and Management (E/M) visit in addition to billing for the application of fluoride varnish, if the sole purpose of the visit was to apply the fluoride varnish. In this instance, the provider may bill for the fluoride varnish code only.

For more information including the payment rate for this service, please see the Part II Policies and Procedures Manual for Dental Services.

*Patients at risk for caries include those with: insufficient sources of dietary fluoride; high carbohydrate diets; caretakers who transmit decay-causing bacteria to children via their saliva; areas of tooth decalcification; reduced salivary flow; and poor oral hygiene. AAP training course also includes “children from low socioeconomic and ethnocultural groups.”

APPENDIX K

EPSDT HIPAA Referral Code Examples

Rev. 10/14

1. Child has come in for an EPSDT Interperiodic Hearing Screen and the provider finds that the child has an ear infection. The provider treats the child for the ear infection at the time of the interperiodic visit and requests a follow up appointment with him in two weeks. What EPSDT referral code should be documented?
A. EPSDT Referral Code: **S2**
2. Child has come in for an EPSDT Screen and has experienced complications with diabetes since birth. The provider treats the child for the diabetes complications at the time of the preventive health visit and does not request a follow up appointment. What EPSDT referral code should be documented?
A. EPSDT Referral Code: **NU**
3. Child has come in for an EPSDT Screen and during the screen, the mother informs the provider that the child has behavior problems. The provider refers the child for further diagnostic testing within two weeks with a Diagnostic and Behavioral Center. What EPSDT referral code should be documented?
A. EPSDT Referral Code: **ST**
4. Child has come in for EPSDT Screen and the provider finds that the child has some developmental problems. The provider refers the child for further diagnostic testing with a Developmental and Behavioral Center. Mom refuses the Developmental and Behavioral appointment. What EPSDT referral code should be documented?
A. EPSDT Referral Code: **AV**

New CMS 1500 Field Locator Instructions

The following table outlines the **revised changes** on the above CMS 1500 claim form version 02/12:

FLD Location	NEW Change
Header	Replaced 1500 rectangular symbol with black and white two-dimensional QR Code (Quick Response Code)
Header	Added “(NUCC)” after “APPROVED BY NATIONAL UNIFORM CLAIM COMMITTEE.”
Header	Replaced “08/05” with “02/12”
Item Number 1	Changed “TRICARE CHAMPUS” to “TRICARE” and changed “(Sponsor’s SSN)” to “(ID#/DoD#).”
Item Number 1	Changed “(SSN or ID)” to “(ID#)” under “GROUP HEALTH PLAN”
Item Number 1	Changed “(SSN)” to “(ID#)” under “FECA BLK LUNG.”
Item Number 1	Changed “(ID)” to “(ID#)” under “OTHER.”
Item Number 8	Deleted “PATIENT STATUS” and content of field. Changed title to “RESERVED FOR NUCC USE.”
Item Number 9b	Deleted “OTHER INSURED’S DATE OF BIRTH, SEX.” Changed title to “RESERVED FOR NUCC USE.”
Item Number 9c	Deleted “EMPLOYER’S NAME OR SCHOOL.” Changed title to “RESERVED FOR NUCC USE.”
Item Number 10d	Changed title from “RESERVED FOR LOCAL USE” to “CLAIM CODES (Designated by NUCC).” Field 10d is being changed to receive Worker’s Compensation codes or Condition codes approved by NUCC. FOR DCH/DXC: FLD 10d on the OLD Form CMS 1500 Claim (08/05) will no longer support receiving the Medicare provider ID.
Item Number 11b	Deleted “EMPLOYER’S NAME OR SCHOOL.” Changed title to “OTHER CLAIM ID (Designated by NUCC)” . Added dotted line in the left-hand side of the field to accommodate a 2-byte qualifier
Item Number 11d	Changed “If yes, return to and complete Item 9 a-d” to “If yes, complete items 9, 9a, and 9d.” (Is there another Health Benefit Plan?)
Item Number 14	Changed title to “DATE OF CURRENT ILLNESS, INJURY, OR PREGNANCY (LMP).” Removed the arrow and text in the right-hand side of the field. Added “QUAL.” with a dotted line to accommodate a 3-byte qualifier. FOR DCH/DXC: Use Qualifiers: 431 (onset of current illness); 484 (LMP); or 453 (Estimated Delivery Date).
Item Number 15	Changed title from “IF PATIENT HAS HAD SAME OR SIMILAR ILLNESS. GIVE FIRST DATE” to “OTHER DATE.” Added “QUALIFIER.” with two dotted lines to accommodate a 3-byte qualifier: 454 (Initial Treatment); 304 (Latest Visit or Consultation); 453 (Acute Manifestation of a Chronic Condition); 439 (Accident); 455 (Last X-ray); 471

FLD Location	NEW Change
	(Prescription); 090 (Report Start [Assumed Care Date]; 091 (Report End [Relinquished Care Date]; 444 (First Visit or Consultation).
Item Number 17	Added a dotted line in the left-hand side of the field to accommodate a 2-byte qualifier – Used by Medicare for identifiers for provider roles: Ordering, Referring and Supervising. FOR DCH/DXC: Use the following Ordering Provider, Referring, Supervising Qualifiers (effective 4/01/2014): Ordering = DK; Referring = DN or Supervising = DQ.
Item Number 19	Changed title from “ RESERVED FOR LOCAL USE ” to “ADDITIONAL CLAIM INFORMATION (Designated by NUCC).” FOR DCH/DXC: Remove the Health Check logic from field 19 and add it in field 24H .
Item Number 21	Changed instruction after title (Diagnosis or Nature of Illness or Injury) from “(Relate Items 1, 2, 3 or 4 to Item 24E by Line)” to “Relate A-L to service line below (24E).”
Item Number 21	Removed arrow pointing to 24E (Diagnosis Pointer).
Item Number 21	Added “ICD Indicator.” and two dotted lines in the upper right-hand corner of the field to accommodate a 1-byte indicator. Use the highest level of code specificity in FLD Locator 21. Diagnosis Code ICD Indicator - new logic to validate acceptable values (0, 9). ICD-9 diagnoses (CM) codes = value 9; or ICD -10 diagnoses (CM) codes = value 0. (Do not bill ICD 10 code sets before October 1, 2015.)
Item Number 21	Added 8 additional lines for diagnosis codes. Evenly space the diagnosis code lines within the field.
Item Number 21	Changed labels of the diagnosis code lines to alpha characters (A-L).
Item Number 21	Removed the period within the diagnosis code lines
Item Number 22	Changed title from “MEDICAID RESUBMISSION” to “RESUBMISSION.” The submission codes are: 7 (Replacement of prior claim) 8 (Void/cancel of prior claim)
Item Numbers 24A – 24 G (Supplemental Information)	The supplemental information is to be placed in the shaded section of 24A through 24G as defined in each Item Number. FOR DCH/DXC: Item numbers 24A & 24G are used to capture Hemophilia drug units. 24H (EPSDT/Family Planning).
Item Number 30	Deleted “BALANCED DUE.” Changed title to “ RESERVED FOR NUCC USE. ”
Footer	Changed “APPROVED OMB-0938-0999 FORM CMS-1500 (08/05)” to “APPROVED OMB-0938-1197 FORM 1500 (02/12).”

Completion of the Health Insurance Claim Form for EPSDT Services Billed by Fee-for-Service Providers

Review these helpful tips for completing the Health Insurance Claim Form (CMS-1500) for EPSDT Services. See Appendix K for EPSDT HIPAA Referral Code Examples.

Item 9 Other Insured's Name

Leave blank. EPSDT preventive health screenings are exempt from third party liability. Even if the member has other insurance, you may file Medicaid first for preventive health services.

Item 21 Diagnosis

Enter the applicable ICD indicator to identify which version of ICD codes is being reported. Enter the indicator between the vertical, dotted lines in the upper right-hand portion of the field.

Enter the codes to identify the patient's diagnosis and /or condition. List no more than **twelve (12)** diagnosis codes. Relate lines A-L to the lines of service in 24E by the letter of the line.

Item 24A Dates of Service (DOS)

The "From" and "To" DOS will always be the same. Since there is only one DOS, enter the date under "From." Leave "To" blank or re-enter "From" date.

Item 24B Place of Service (POS)

Enter POS code 99 for all preventive health services and interperiodic visits.

Item 24C EMG (emergency)

Leave blank for "No".

Item 24D HCPCS Code and Modifier

Enter procedure code and the EP modifier, plus any additional modifiers as applicable.

Item 24E Diagnosis Pointer

Enter the diagnosis code reference letter (pointer) to relate to the DOS and the procedures performed to the primary diagnosis. When multiple services are performed, the primary reference letter for each service should be listed first, other applicable services should follow. Do not use commas between letters.

Item 24H HIPAA EPSDT Referral Codes

- If EPSDT screening resulted in an EPSDT referral, enter the appropriate referral code:
 - ✓ Document AV, S2, or ST in the shaded area of box 24H
- If EPSDT screening did not result in an EPSDT referral:
 - ✓ Document NU in the shaded area of box 24H
- A "Y" for Yes or "N" for No is **not** entered with the referral code in the shaded area or in the unshaded area of box 24H.

APPENDIX N

Rev. 07/13
Rev. 04/14

General Claims Submission Policy for Ordering, Prescribing, or Referring (OPR) Providers

The Affordable Care Act (ACA) requires physicians and other eligible practitioners who order, prescribe and refer items or services for Medicaid beneficiaries to be enrolled in the GA Medicaid Program . As a result, CMS expanded the claim editing requirements in Section 1833(q) of the Social Security Act and the providers' definitions in sections 1861-r and 1842(b)(18)C. Therefore, claims for services that are ordered, prescribed or referred must indicate who the ordering, prescribing or referring (OPR) practitioner is. The Department will utilize an enrolled OPR provider identification number for this purpose. Any OPR physicians or other eligible practitioners who are NOT already enrolled in Medicaid as participating (i.e. billing) must enroll separately as OPR. The National Provider Identifier (NPI) of the OPR provider must be included on the claim submitted by the participating , i.e. rendering provider. If the NPI of the OPR provider noted on the Georgia Medicaid claim is associated with a provider who is not enrolled in the Georgia Medicaid program, the claim will not be paid.

Effective 4/1/2014, DCH will begin editing claims submitted through the web, EDI, and on CMS 1500 forms for the presence of an ordering, prescribing or referring provider as required by program policy. The edit will be informational until 6/1/2014. Effective 6/1/2014, the ordering, prescribing or referring provider will become a mandatory field and claims that do not contain the information as required by policy will begin to deny.

For the New CMS-1500 claim form:

Enter qualifiers to indicate if the claim has an ordering, prescribing or referring to the left of the dotted line in box 17 (Ordering = DK; Referring = DN or Supervising = DQ).

For claims entered via the web:

Claims headers were updated to accept ordering or referring Provider ID and name for Dental and Institutional claims and the referring provider's name for Professional claims. The claim detail was updated to accept an ordering or referring provider ID and name. Utilize the "ordering" provider field for claims that require a prescribing physician.

For claims transmitted via EDI:

The 837 D, I and P companion guides were updated to specifically point out the provider loops that capture the rendering, ordering, prescribing, referring and service facility provider information that is now used to transmit OPR information.

Begin: “I’m going to ask you a few questions that I ask all my patients. Please be honest. I will keep your answers confidential.”

Part A

During the PAST 12 MONTHS, did you:	No	Yes
1. Drink any <u>alcohol</u> (more than a few sips)? (Do not count sips of alcohol taken during family or religious events.)	<input type="checkbox"/>	<input type="checkbox"/>
2. Smoke any <u>marijuana or hashish</u> ?	<input type="checkbox"/>	<input type="checkbox"/>
3. Use <u>anything else to get high</u> ? ("anything else" includes illegal drugs, over the counter and prescription drugs, and things that you sniff or "huff")	<input type="checkbox"/>	<input type="checkbox"/>

For clinic use only: Did the patient answer “yes” to any questions in Part A?

No ☐

Yes ☐

Ask CAR question only, then stop

Ask all 6 CRAFFT questions

Part B

	No	Yes
1. Have you ever ridden in a <u>CAR</u> driven by someone (including yourself) who was “high” or had been using alcohol or drugs?	<input type="checkbox"/>	<input type="checkbox"/>
2. Do you ever use alcohol or drugs to <u>RELAX</u> , feel better about yourself, or fit in?	<input type="checkbox"/>	<input type="checkbox"/>
3. Do you ever use alcohol or drugs while you are by yourself, or <u>ALONE</u> ?	<input type="checkbox"/>	<input type="checkbox"/>
4. Do you ever <u>FORGET</u> things you did while using alcohol or drugs?	<input type="checkbox"/>	<input type="checkbox"/>
5. Do your <u>FAMILY</u> or <u>FRIENDS</u> ever tell you that you should cut down on your drinking or drug use?	<input type="checkbox"/>	<input type="checkbox"/>
6. Have you ever gotten into <u>TROUBLE</u> while you were using alcohol or drugs?	<input type="checkbox"/>	<input type="checkbox"/>

Screening Tools

Patient Health Questionnaire-2 (PHQ-2)

PHQ-2

Over the past two weeks, how often have you been bothered by any of the following problems?

Little interest or pleasure in doing things.

0 = Not at all

1 = Several days

2 = More than half the days

3 = Nearly every day

Feeling down, depressed, or hopeless.

0 = Not at all

1 = Several days

2 = More than half the days

3 = Nearly every day

Total point score: _____

Score interpretation:

<i>PHQ-2 score</i>	<i>Probability of major depressive disorder (%)</i>	<i>Probability of any depressive disorder (%)</i>
1	15.4	36.9
2	21.1	48.3
3	38.4	75.0
4	45.5	81.2
5	56.4	84.6
6	78.6	92.9

APPENDIX R

2017 Recommendations for Preventive Pediatric Health Care (Copyright © 2017 by the AAP, updated February 2017)

The Division adopted the AAP 2017 Bright Futures “Recommendations for Pediatric Health Care” Periodicity Schedule effective date July 1, 2017.

The schedule is available at https://www.aap.org/en-us/documents/periodicity_schedule.pdf

The changes implemented in the 2017 schedule include numerous footnote revisions. The following is a summary of changes:

HEARING

- Timing and follow-up of the screening recommendations for hearing during the infancy visits have been delineated. Adolescent risk assessment has changed to screening once during each time period.
- Footnote 8 has been updated to read as follows: “Confirm initial screen was completed, verify results, and follow up, as appropriate. Newborns should be screened, per ‘Year 2007 Position Statement: Principles and Guidelines for Early Hearing Detection and Intervention Programs’ (<http://pediatrics.aappublications.org/content/120/4/898.full>).”
- Footnote 9 has been added to read as follows: “Verify results as soon as possible, and follow up, as appropriate.”
- Footnote 10 has been added to read as follows: “Screen with audiometry including 6,000 and 8,000 Hz high frequencies once between 11 and 14 years, once between 15 and 17 years, and once between 18 and 21 years. See ‘The Sensitivity of Adolescent Hearing Screens Significantly Improves by Adding High Frequencies’ ([http://www.jahonline.org/article/S1054-139X\(16\)00048-3/fulltext](http://www.jahonline.org/article/S1054-139X(16)00048-3/fulltext)).”

PSYCHOSOCIAL/BEHAVIORAL ASSESSMENT

- Footnote 13 has been added to read as follows: “This assessment should be family centered and may include an assessment of child social-emotional health, caregiver depression, and social determinants of health. See ‘Promoting Optimal Development: Screening for Behavioral and Emotional Problems’ (<http://pediatrics.aappublications.org/content/135/2/384>) and ‘Poverty and Child Health in the United States’ (<http://pediatrics.aappublications.org/content/137/4/e20160339>).”

TOBACCO, ALCOHOL, OR DRUG USE ASSESSMENT

- The header was updated to be consistent with recommendations

DEPRESSION SCREENING

- Adolescent depression screening begins routinely at 12 years of age (to be consistent with recommendations of the US Preventive Services Task Force [USPSTF]).

APPENDIX R

MATERNAL DEPRESSION SCREENING

- Screening for maternal depression at 1-, 2-, 4-, and 6-month visits has been added.
- Footnote 16 was added to read as follows: “Screening should occur per ‘Incorporating Recognition and Management of Perinatal and Postpartum Depression Into Pediatric Practice’ (<http://pediatrics.aappublications.org/content/126/5/1032>).”

NEWBORN BLOOD

- Timing and follow-up of the newborn blood screening recommendations have been delineated.
- Footnote 19 has been updated to read as follows: “Confirm initial screen was accomplished, verify results, and follow up, as appropriate. The Recommended Uniform Newborn Screening Panel (http://www.hrsa.gov/advisorycommittees/mchbadvisory/heritable_disorders/recommendedpanel/uniformscreeningpanel.pdf), as determined by The Secretary’s Advisory Committee on Heritable Disorders in Newborns and Children, and state newborn screening laws/regulations (<http://genes-r-us.uthscsa.edu/sites/genes-r-us/files/nbsdisorders.pdf>) establish the criteria for and coverage of newborn screening procedures and programs.”
- Footnote 20 has been added to read as follows: “Verify results as soon as possible, and follow up, as appropriate.”

NEWBORN BILIRUBIN

- Screening for bilirubin concentration at the newborn visit has been added.
- Footnote 21 has been added to read as follows: “Confirm initial screening was accomplished, verify results, and follow up, as appropriate. See ‘Hyperbilirubinemia in the Newborn Infant ≥ 35 Weeks’ Gestation: An Update with Clarifications’ (<http://pediatrics.aappublications.org/content/124/4/1193>).”

DYSLIPIDEMIA

- Screening for dyslipidemia has been updated to occur once between 9 and 11 years of age, and once between 17 and 21 years of age (to be consistent with guidelines of the National Heart, Lung, and Blood Institute).

SEXUALLY TRANSMITTED INFECTIONS

- Footnote 29 has been updated to read as follows: “Adolescents should be screened for sexually transmitted infections (STIs) per recommendations in the current edition of the AAP Red Book: Report of the Committee on Infectious Diseases.”

APPENDIX R

HIV

- A subheading has been added for the HIV universal recommendation to avoid confusion with STIs selective screening recommendation.
- Screening for HIV has been updated to occur once between 15 and 18 years of age (to be consistent with recommendations of the USPSTF).
- Footnote 30 has been added to read as follows: “Adolescents should be screened for HIV according to the USPSTF recommendations (<http://www.uspreventiveservicestaskforce.org/uspstf/uspshivi.htm>) once between the ages of 15 and 18, making every effort to preserve confidentiality of the adolescent. Those at increased risk of HIV infection, including those who are sexually active, participate in injection drug use, or are being tested for other STIs, should be tested for HIV and reassessed annually.”

ORAL HEALTH

- Assessing for a dental home has been updated to occur at the 12-month and 18-month through 6-year visits. A subheading has been added for fluoride supplementation, with a recommendation from the 6-month through 12-month and 18-month through 16-year visits.
- Footnote 32 has been updated to read as follows: “Assess whether the child has a dental home. If no dental home is identified, perform a risk assessment (<http://www2.aap.org/oralhealth/docs/RiskAssessmentTool.pdf>) and refer to a dental home. Recommend brushing with fluoride toothpaste in the proper dosage for age. See ‘Maintaining and Improving the Oral Health of Young Children’ (<http://pediatrics.aappublications.org/content/134/6/1224>).”
- Footnote 33 has been updated to read as follows: “Perform a risk assessment (<http://www2.aap.org/oralhealth/docs/RiskAssessmentTool.pdf>). See ‘Maintaining and Improving the Oral Health of Young Children’ (<http://pediatrics.aappublications.org/content/134/6/1224>).”
- Footnote 35 has been added to read as follows: “If primary water source is deficient in fluoride, consider oral fluoride supplementation. See ‘Fluoride Use in Caries Prevention in the Primary Care Setting’ (<http://pediatrics.aappublications.org/content/134/3/626>).”
